# eSTP for Forex and MM: advantages

ArcelorMittal

- Better security for the whole transaction process workflow
- Real-time follow-up
- Zero paper !!!!
- Time and human resource saving
- In line with EMIR requirements regarding timely confirmation, UTI exchange, ....

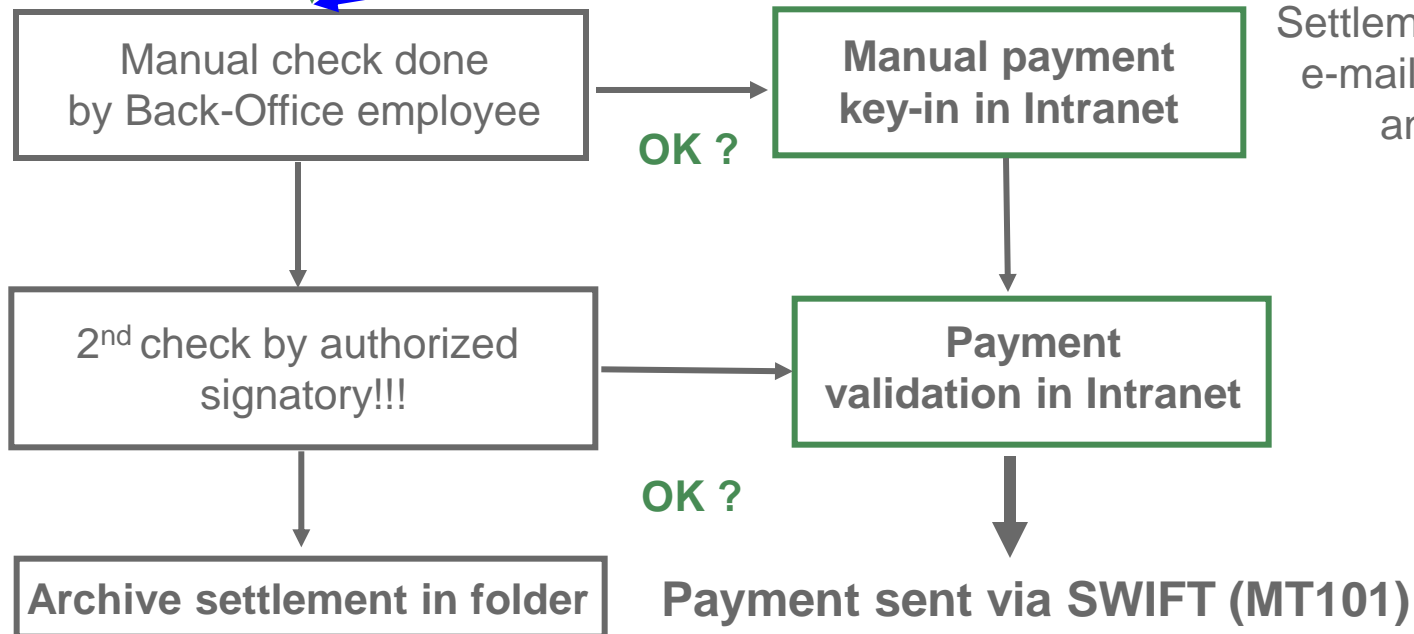

# Commodity derivatives: the imperfect world (1)

# Commodity derivatives: the imperfect world (2)

Deal settlement report  
from deal management system

Settlement report sent via fax,  
e-mail or downloaded from  
an internet website

# Present situation for commodities: disadvantages

ArcelorMittal

- Paper and human based process with greater risk of mistakes
- No unification of paper confirmation formats (each counterparty has its own way to present the deal data to be checked)
- No real-time follow-up
- Time and human resource consuming
- Not in line with EMIR requirements regarding timely confirmation, UTI exchange, ....

# eSTP for base metal commodity derivatives: from a stand-alone solution to a SWIFT initiative

ArcelorMittal

- Decision to launch a stand-alone initiative starting mid-2012
- Solution for OTC deals
- Message format chosen → SWIFT MTn98 (free format class) with 1 message for the initial deal confirmation and 1 message for the settlement period.
- Messages presented to SWIFT and initiative taken over by SWIFT since end of 2012.
- Now covers needs for base metals and energy forwards, swaps and options (asian and swaptions).
- *Need to have more corporates in the initiative and to enter in a testing phase now.*
