Disclaimer

This document is a marketing communication of the Interest Rates and Forex Derivatives department in the Global Markets Division of Société Générale. It is not a product of Société Générale's Research Department and should not be treated as a research report. The contents of this document reflect the views of the Interest Rates and Forex Derivatives department in the Global Markets Division of Société Générale and not necessarily those of Société Générale.

The contents of this document are given for purely indicative purposes and have no contractual value.

Société Générale do not provide legal, tax or accounting advice.

This document does not constitute an offer, or an invitation to make an offer, from Société Générale to purchase or sell a product.

Société Générale holds at your disposal a detailed presentation of each product it is able to offer to its clients.

Société Générale's provision of liquidity will only be available under normal market conditions.

This document is confidential and may be neither communicated to any third party (with the exception of external advisors on the condition that they themselves respect this confidentiality undertaking) nor copied in whole or in part, without the prior written consent of Société Générale.

The accuracy, completeness or relevance of the information which has been drawn from external sources is not guaranteed although it is drawn from sources reasonably believed to be reliable. Subject to any applicable law, Société Générale shall not assume any liability in this respect.

The market information displayed in this document is based on data at a given moment and may change from time to time.

Société Générale is a French credit institution (bank) authorised by the Autorité de Contrôle Prudentiel et de Résolution (the French Prudential Control and Resolution Authority).

UK Notice: This publication is issued in the United Kingdom by or through Société Générale London Branch. Société Générale is a French credit institution (bank) authorised and supervised by the Autorité de Contrôle Prudentiel (the French Prudential Control Authority). Société Générale is subject to limited regulation by the Financial Services Authority ("FSA") in the U.K. Details of the extent of SOCIÉTÉ GÉNÉRALE's regulation by the FSA are available from SOCIÉTÉ GÉNÉRALE on request.

Spanish Notice: This document might be issued in Spain by or through SOCIÉTÉ GÉNÉRALE Spanish Branch which is supervised by the Comisión Nacional del Mercado de Valores ("CNMV") for the conduct of its Spanish business on financial instruments.

Italian Notice: This document is issued solely to "professional investors" as defined under the Legislative Decree n.58 dated 24 February 1998 (the "Italian Financial Act") and the relevant implementing regulations.

US Notice: This document is confidential and is provided solely for information purposes to US Institutional Investors only pursuant to SEC Rule 15a-6. In order to conform with the requirements of US securities law, any US person wishing to discuss this report or effect transactions in any security discussed herein should do so with or through SG Americas Securities, LLC ("SGAS"), a US Securities and Exchange Commission registered broker-dealer located at 245 Park Avenue, New York, NY, 10167-0002, telephone (212) 278-6000.

SGAS is a member of FINRA and SIPC, and is a wholly owned subsidiary of Société Générale. Any services provided outside the US or related to lending and other banking activities may be provided by Société Générale or another banking affiliates of SGAS.

Canadian Notice: This document is only intended for use by Permitted Clients, as defined under National Instrument 31-103, Accredited Investors, as defined under National Instrument 45-106, Accredited Counterparties as defined under the Derivatives Act (Quebec) and Qualified Parties as defined under the ASC, BCSC, SFSC Orders and the NBLR.

Hong Kong Notice: This document is distributed in Hong Kong by SG Securities (HK) Limited and Societe Generale Hong Kong Branch, which is regulated by Securities and Futures Commission and Hong Kong Monetary Authority. This document is issued solely to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571) of Hong Kong and any rules made under that Ordinance.

Singapore Notice: This document is provided in Singapore by or through SOCIÉTÉ GÉNÉRALE, Singapore Branch and is only provided to accredited investors, expert investors and institutional investors, as defined in Section 4A of the Securities and Futures Act, Cap. 289. Recipients of this document are to contact Société Générale, Singapore Branch in respect of any matters arising from, or in connection with, the document. If you are an accredited investor or expert investor, please be informed that in our dealings with you, we are relying on certain exemptions to the Financial Advisers Act. Cap. 110 ("FAA") - (1) the exemption in Regulation 33 of the Financial Advisers Regulations ("FAR"), which exempts us from complying with Section 25 of the FAA on disclosure of product information to clients; (2) the exemption set out in Regulation 34 of the FAR, which exempts us from complying with Section 27 of the FAA on recommendations; and (3) the exemption set out in Regulation 35 of the FAR, which exempts us from complying with Section 36 of the FAA on disclosure of certain interests in securities.

Japanese Notice: This document is distributed for information purposes only, by either Societe Generale Securities (North Pacific) Ltd., Tokyo Branch ("SGSNP") or Societe Generale, Tokyo Branch ("SGTB"). As a consequence, this document does not constitute an offer, or an invitation to make an offer, from either SGSNP or SGTN, to purchase or sell a product.

This document is intended only for Qualified Institutional Investors as defined in the Financial Instruments and Exchange Act of Japan and only for those investors to whom it is sent directly by Société Générale Securities, Tokyo Branch, and under no circumstances should it be communicated or forwarded to any third party nor copied in whole or in part, without the prior written consent of Société Générale, Tokyo Branch.

Australian Notice: Societe Generale is exempt from the requirement to hold an Australian financial services licence (AFSL) under the Corporations Act 2001 (Cth) in respect of financial services, in reliance on ASIC Class Order 03/824, a copy of which may be obtained at the web site of the Australian Securities and Investments Commission, <http://www.asic.gov.au>. The class order exempts financial services providers with a limited connection to Australia from the requirement to hold an AFSL where they provide financial services only to wholesale clients in Australia on certain conditions. Financial services provided by Societe Generale may be regulated under foreign laws and regulatory requirements, which are different from the laws applying in Australia.

Important Information

Please Read

Korean Notice: This document is distributed in Korea by SOCIÉTÉ GÉNÉRALE Seoul Branch, which is a bank branch in Korea duly licensed and regulated by the Financial Services Commission of Korea. This document does not constitute a solicitation or an offer of transactions. This material is intended only to whom it is sent directly by Société Générale Seoul Branch, and under no circumstances should it be forwarded to any third party. The products mentioned in this report may not be eligible for sale in Korea and/or they may not be suitable for all types of investors.

China Notice: This document is distributed for information purposes only. The product(s) mentioned in this document may not be eligible or available for sale in China and may not be suitable for all types of investors.

Taiwan Notice: This document is to present you with all capital markets activities within SOCIÉTÉ GÉNÉRALE group and may only be distributed to institutional investors. The product(s) mentioned in this document may not be eligible or available for sale in Taiwan and may not be suitable for all types of investors.

India Notice: This document is to present to you the capabilities of Société Générale and its subsidiaries or affiliates and is offered in India to only those Resident Indian Clients who have or who have sought the requisite approvals from the Reserve Bank of India or any other competent authorities under the applicable laws and regulations. All the products mentioned in this document may not be available to you.

Argentina Notice: The products and services described in this document have not and will not be marketed in Argentina by means of a public offer, as such term is defined under Section 16 of Law N° 17,811, as amended. No application has been made nor will be made with the Argentine Comisión Nacional de Valores, the Argentine securities governmental authority, to offer any of these products or services in Argentina.

Brazil Notice: This document is provided for informational purposes only and does not constitute an offer to negotiate any derivative, other financial instrument or any security or investment in Brazil, so that Société Générale is exempt in an absolute manner from any and all potential liability or responsibility resulting from the course of conduct adopted by you and/or any losses borne by you. While based on information believed to be reliable, no guarantee is given that it is accurate or complete. The opinions, forecasts, assumptions, estimates and derived valuations contained in this document are subject to change at any time without prior notice.

Chile Notice: These terms and conditions are indicative and for illustrative and informational purposes only. Societe Generale ("SG") is not offering to sell or soliciting offers to sell the any products or services described herein. All levels or spreads that might be set forth herein are indicative, depend upon market conditions, are subject to change and do not represent a live price or a commitment by SG to sell the products or services described herein. The information provided herein does not reflect actual or final terms at which SG would be willing to enter into a transaction or sell a product. The information, terms and assumptions herein are subject to change without notice. Any such changes may have a material impact on the returns and risks detailed. Upon the reception of this document, the recipient agrees that SG is not soliciting any action on the part of the recipient. The recipient understands that, should it determine

to enter into a transaction with, or purchase a product from, SG that such investment or product will not be executed in Chile and will not be subject to Chilean law, save for Chilean foreign exchange and tax regulations. SG is not a registered securities broker/dealer in Chile or a licensed commercial bank in Chile. No action has been taken by SG to permit a public offering in any jurisdiction. This document can neither be deemed as a valid prospectus or selling material under any jurisdiction nor the commitment by SG or any of its affiliates to initiate the registration or procurement of any license –to become a broker/dealer of securities or a commercial bank under Chilean law. The recipient of this information represents that (a) it will consult its own legal, regulatory, tax, business, investment, financial, and accounting advisers to the extent it deems necessary and (b) it will make its own investment, hedging, and trading decisions based upon its own judgment and upon any advice from such advisers as it deems necessary.

Colombia Notice: Société Générale does not have a subsidiary in Colombia. Any products or services referenced herein are provided from outside of Colombia. Colombian residents must comply with any applicable exchange control regulations and any other applicable local requirements.

Mexico Notice: The information contained in this document has not been reviewed or authorized by the Mexican Banking and Securities Commission (Comisión Nacional Bancaria y de Valores). Nothing contained herein shall be construed as an offer to sell or the solicitation of an offer to buy the products or services described herein. The products or services described herein have not been registered with the National Securities Registry (Registro Nacional de Valores) and may not be publicly offered or sold in Mexico. The recipient hereby represents and warrants that it is a qualified investor (inversionista calificado) within the meaning of the Mexican Securities Law (Ley del Mercado de Valores) and the regulations in effect as of the date hereof. In making any decision regarding the products and services described herein, the recipient does so at its own risk.

Peru Notice: The information provided herein may not be deemed a public offer. Any products and services related to this information have not been and will not be registered before the Superintendencia del Mercado de Valores (SMV) and would be placed by means of a private offer from outside of Peru. SMV has not reviewed the information provided herein. This offering material is only for the exclusive use of institutional investors in Peru and is not for public distribution.

Uruguay Notice: The document should not be deemed a public offer of any product or services in Uruguay subject to law nbr. 16.749. The sale of any related products or services would qualify as a private placement pursuant to section 2 of Uruguayan law 18,627 and would not be registered with the Financial Services Superintendency of the Central Bank of Uruguay.

Morocco Notice: The information contained in this document has not been reviewed or authorized by the Bank Al-Maghrib.

Additional information is available upon request. This brochure may not be reproduced or redistributed in whole or in part without the prior consent of SOCIÉTÉ GÉNÉRALE or its affiliates.

2015-16 | EMERGING CURRENCY & FIXED INCOME GUIDE

CENTRAL & EASTERN EUROPE

EMERGING STRATEGY OUTLOOK

CENTRAL & EASTERN EUROPE

Reduced
vulnerabilities

Societe Generale Emerging Strategy

CEE countries have embarked on reducing macro vulnerabilities, with a noticeable improvement in fiscal positions, financial policies and in significant external rebalancing. Vulnerabilities for CEE countries are now at or near a 6-year low. Additionally, disinflationary dynamics and impetus for fiscal adjustment in CEE have created more room for manoeuvre. We believe that underperformance in CEE FX may persist through 2015; disadvantaged by both low carry and mixed economic prospects.

In Poland, the country enjoys robust macro fundamentals and favourable financial stability, although it has moderate external vulnerabilities. Deflation is likely to persist in Poland this year, with inflation in negative territory. Additionally, the National Bank of Poland is likely to maintain unchanged interest rates during 2015, although risks to our policy rates forecast are to the downside. We believe that Polish assets are likely to remain resilient relative to its CEE peers, with episodes of short-term weakness against EUR offering buying opportunities.

In the Czech Republic, the economy has fared well thus far, posting solid growth rates. We estimate that fiscal expansion should reach a total of 1.2 percentage points this year due to new measures on both the revenue side and the expenditure side. Additionally, the intervention regime will remain under scrutiny. The Czech Koruna remained very stable in 2014 versus the euro after the introduction of a cap at 27 EUR/CZK in 2013, and we expect CZK to weaken further this year amid the disinflationary pressures. The expected inflation trajectory supports our view that the central bank would not exit the current cap regime before mid-2016.

In Hungary, macro-economic performance is likely to weaken moderately this year, but will not be a source of concern. While officials are focused on reducing the country's external vulnerabilities and maintaining fiscal discipline, Hungarian politics

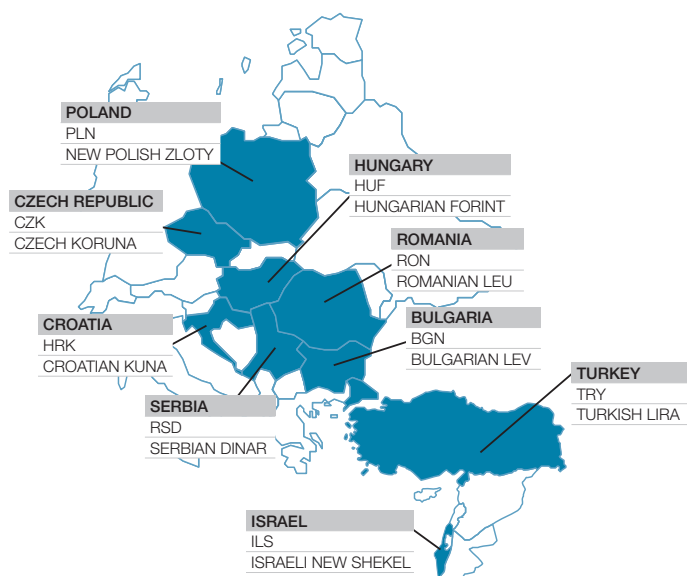

are becoming a risk factor to watch. Furthermore, persistent deflationary dynamics of low energy prices and Euro-zone deflation are likely to substantially increase Hungary's monetary policy space, with further interest rate cuts to be implemented in the period ahead.

In Romania, growth performance is likely to remain in line with that of 2014, albeit relying more on domestic demand forces. We may observe occasional bouts of political noise, with limited impact on Romanian assets in 2015. Furthermore, soft inflation pressures and lending dynamics command further action from the central bank. We believe that the National Bank of Romania will remain defensive about FX developments, thus anchoring RON within a tight range.

In Turkey, the country displays reasonable macro-economic performance and moderate fiscal space, with the GDP growth momentum and prospects moderate relative to other EM countries. Disinflationary dynamics have increased scope for monetary policy flexibility, and may contribute to external rebalancing. Additionally, elevated external vulnerabilities in Turkey, mainly stemming from an elevated current account deficit and a heavy weight of short-term external debt, are partly mediated by their FX reserves (at about 6 months of import cover).

In Israel, the country appears as an island of resilience boasting a robust external position, with economic performance likely to remain resilient in 2015. Bol expects GDP to rebound to 3.2% yoy this year, as negative base effects from the start of the gas production fizzle out. However, uncertainties related to the general elections and escalation of geopolitical unrest may shape the risk outlook. With the economy displaying sufficient resilience, the Bank of Israel will likely be disinclined to resort to systematic FX intervention in USD/ILS.

SOCIETE GENERALE CEE STRENGTHS

The combination of the core SG CIB EM offering and the SG Group International Retail Banking network, in the CEEMEA region, enables us to provide our clients with unrivalled access to markets and a strong EM offering across a wide product range including CEE & Frontier Currencies in FX, CEE Government Bonds.

A SOLID CEE LOCAL FOOTPRINT

- Leading Providers of Emerging Market Products in the CEE region, with a distinguished offering and presence in CEE5.
- Strong International Retail Network with a large branch network in the CEEMEA Region with over 3,800 branches and over 60,000 employees provides us unparalleled access to local Risk, Assets and Market Liquidity

**Best FX Provider in
Central & Eastern
Europe 2011-2015**

AREAS OF STRENGTH

- Leading provider in CEE Local Government Debt through our primary dealerships in Poland, Czech Republic, Romania, Russia
- A top player in CEEMEA FX Credit derivatives
- Main currencies of strength : PLN, RUB, HUF, CZK, RON
- An unmatched market access and execution capabilities in illiquid/frontier currencies

- Top 1** Eastern European Currencies
- Top 3** CEE overall
- Top 5** Russia Overall
- Top 2** Czech Republic Overall
- Top 4** Poland Corporates

CEE SETUP AND OPERATING STRUCTURE

SG CIB BRANCH IN LONDON

- Dedicated Emerging Market Desk including 20+ Front officers (Sales and trading)
- Emerging Strategists

LOCAL PLATFORMS & INTERNATIONAL BRANCH NETWORK – CEE5

An integrated and fully aligned Fixed Income operating platform enables the delivery of seamless solutions in CEE5 markets:

- In Russia with ROSBANK
- In the Czech Republic with KOMERCNI BANKA (KB)
- In Romania with BRD
- In Poland which is a full branch of SG CIB

INTERNATIONAL BRANCH NETWORK – OTHER

In addition to the core CEE5 regions, SG also has a large branch and subsidiaries network in Albania, Bulgaria, Croatia, Czech Republic, Georgia, Macedonia, Moldova, Montenegro, Romania, Russia, Serbia, Slovakia, Slovenia

CEE OFFERING

SG CIB/INTERNATIONAL RETAIL NETWORK LARGE PRODUCTS OFFERING

- Full product capabilities in CEE5 currencies RUB, PLN, CZK and RON included
- FX cash and derivatives, Interest rates derivatives, Local Government debt including access to primary markets
- Corporate bonds denominated in local currencies (mostly in PLN and RUB)
- Selective Hard currencies bonds from EM issuers (Sovereign, Corporate)

COMPREHENSIVE ACCESS TO MARKET LIQUIDITY

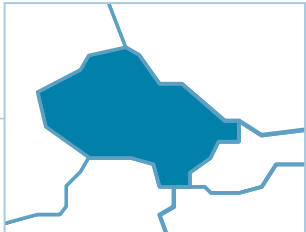

- Integrated market-making platforms providing the best liquidity of onshore and offshore in these CEE5 markets
- Local market liquidity for international players and, vice versa, global liquidity for local players

A SOLID LINK TO OTHER LOCAL CEE MARKETS

- Enables us to offer diversified products across asset classes in other CEE currencies
- Gives SG access to premium information about these growing markets and investment opportunities

BULGARIA – BGN

(BULGARIAN LEV) Deliverable **No** Convertible **Yes**

Pegged to the euro (1 EUR = 1.95583 BGN)

On the 5th July 1999 the Lev was re-denominated: the post-July 5th is equal to 1,000 pre-July 5th Lev. Annual growth averaged more than 6% from 2004 to 2008, driven by significant amounts of foreign direct investment and consumption. Successive governments have demonstrated a commitment to economic reforms and fiscal planning, but the global downturn sharply reduced domestic demand, exports, capital inflows, and industrial production. GDP contracted by approximately 5% in 2009, and stagnated in 2010, despite a significant recovery in exports. Over the past few years, policy continuity has supported financial stability, despite political and social challenges, but growth is only expected to pick up slowly in the period ahead.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 10%
- **Capital gains:** taxed as ordinary business income at general corporate income tax rate. Gains realized as a result of the disposal of financial instruments on regulated stock markets in Bulgaria or another EEA country are exempt. The "disposal of financial instruments" is defined as meaning transactions with shares and rights over shares of listed companies, or transactions under the terms and according to the procedure of repurchase or redemption of securities performed by collective investment schemes
- **Withholding tax**
 - **WHT dividend:** a 5% final withholding tax is levied on dividends, unless a lower treaty rate, the European Union-Switzerland Savings Agreement EU or the Parent-Subsidiary Directive applies. Dividends and liquidation quotas paid to entities residing in an EEA country are exempt from withholding tax. The exemption does not apply to dividends in the form of hidden distribution of profits. No other conditions apply in order to qualify for the exemption

- **WHT interest:** A 10% withholding tax is levied on interest. No WHT applies on interest paid to affiliated EU entities (EU Interest and Royalties Directive). Exemption applies, inter alia, to interest income derived from a loan granted to the state or the municipalities under which no bonds are issued; to interest derived from bonds and other debt securities issued by a Bulgarian company, the state and municipalities and traded on a regulated stock exchange in Bulgaria or another EU/EEA country

REGULATION AND REPATRIATION

- No restriction for cross-border transfers. The grounds for any transfer from Bulgaria to other non-EU/non-EEA country, exceeding 30 000 BGN or equivalent in foreign currency, must be certified to the bank before execution
- Capital, profits and interest can be repatriated
- Equal access to local securities for domestic and foreign investors
- Every local or foreign person may own an unlimited number of accounts in any currency, in any bank in Bulgaria

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

CROATIA – HRK

(CROATIAN KUNA) Deliverable **Yes** Convertible **Yes**

Between 2000 and 2007, Croatia's economic fortunes began to improve, with steady GDP growth. Nevertheless, problems remain, including a high unemployment rate, a growing trade deficit and uneven regional development. The state retains a large role in the economy, as privatization efforts often meet public & political resistance. Croatia's high foreign debt, anemic export sector, strained state budget, and over-reliance on tourism revenue will result in higher risk to economic stability over the medium term. A referendum on the EU accession of the Republic of Croatia (RoC) was held in 2012: Croatia gave the green light to the country's accession to the EU in July 2013.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 20%
- **Capital gains:** selling own stocks or shares are not taxed
- **Withholding tax**
 - **On dividends:** 12% for dividends paid to non-resident companies
 - **On interest:** 15% paid to non-resident companies, unless a lower Treaty rate or the Parent-Subsidiary Directive applies. Exemption applies to interest on commodity loans, interest on loans granted by foreign institutions, interest on bonds.

REGULATION AND REPATRIATION

- OEU regulations concerning payments is effective. Is distinguished national, cross border and international payment transactions. For national and cross border transactions, principle of equality of charges is applied. National transactions in foreign currencies are free between non-residents, but payments between residents in foreign currencies are permitted only in special cases prescribed by law. The payment in foreign currencies are permitted for the capital businesses, except in cases as

follows which must be done in HRK:

- Buying and selling of real estate in the RoC and a share in the commercial companies with head office in the RoC;
- Buying and selling of a share in the investment funds established according to the regulations of the RoC;
- Buying and selling of securities which quote or are issued in the RoC regardless whether they are denominated in foreign currency or in HRK, except the securities which are issued in the RoC, and they are quoted abroad. A prohibition does not refer to the purchase and sale of securities on the primary market issued by the RoC which are in a foreign currency denomination. It is free for residents to open accounts in foreign banks. Also, loans between resident and non residents are free but some subject to CNB reporting.
- Cash pooling is allowed. Foreign investors can transfer profits and capital. Foreign investments in securities are not limited or subject to special restrictions

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

CZECH REPUBLIC – CZK

(CZECH KORUNA) Deliverable **Yes** Convertible **Yes**

The Czech koruna has been a free-floating currency since 1997 and the FX regime was liberalized in 1999. The CNB focuses on stability in consumer prices, with a 2% CPI target (+/-1%). The Czech economy is sound with no major imbalance. The main threat to the economy is its reliance on external demand, given the predominance of the export sector. Fiscal restrictions will be implemented in the coming years in order to cut the budget deficit to less than 3% of GDP. The government expects to balance the budget by 2016. Although convergence is well advanced and fiscal criteria should be reached in a few years, the country is not willing to join the Euro zone in the foreseeable future. After pushing benchmark interest rates towards 0.05% in 2013, the CNB had started to use the exchange rates as a monetary policy tool in November by setting a floor in EUR/CZK at 27.00.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 19%. A 5% rate applies to mutual and pension funds and to the profits of investments funds
- **Capital gains:** included with other taxable income and taxed at the regular corporate income tax rate
- **Withholding tax**
 - **On dividends:** Dividends are subject to a final 15% WHT, unless a lower treaty rate applies or the EC parent-subsidiary directive
 - **On interest:** 15 % WHT unless a lower treaty rate applies or the EC Interest and Royalties Directive

REGULATION AND REPATRIATION

- Companies can borrow locally and internationally
- Corporations are allowed to keep the foreign exchange gained on exports
- If interest or dividends are being repatriated cross-border, it is also necessary to consider how to reduce or avoid withholding tax. For the Czech Republic, being an EU member state, this is often done under the terms of the Interest Royalties Directive or the Parent Subsidiary Directive. Alternatively, this is managed by the selection of a holding country that has concluded a suitably beneficial double taxation agreement with the Czech Republic

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

HUNGARY – HUF

(HUNGARIAN FORINT) Deliverable **Yes** Convertible **Yes**

Hungary joined the EU in 2004. The Government's austerity measures, imposed since late 2006, have reduced the budget deficit but public debt remains too high at almost 80% of GDP. In 2010 the new government implemented a number of changes. The economy rebounded in 2010 with a big boost from exports. Unemployment remained high, at more than 10% in 2010. Domestic demand remains weak however and the deleveraging process will continue to weigh on economic growth for some time. Hungary's economy has not yet recovered to pre-crisis levels. Continued weakness in private consumption and investment, compounded by a sizable fiscal consolidation, contributed to the downturn over the past few years. Macroeconomic performance is set to recover modestly in the period ahead.

ISRAEL – ILS

(ISRAELI NEW SHEQEL) Deliverable **Yes** Convertible **Yes**

The Israeli shekel now floats freely. Until June 2005 it was tracked against a trade-weighted basket of 63% USD, 22% EUR, 9% GBP, and 6% JPY. Foreign exchange controls were gradually reduced through the 1990's until complete abolition early 2003, when the currency became fully convertible. Following GDP growth of 4% in 2008, Israel's GDP slipped to 0.2% in 2009, but reached 3.4% in 2010, as exports rebounded. The Israeli Government responded to the recession by implementing a fiscal stimulus package and an expansionary monetary policy - including cutting interest rates to record lows, purchasing government bonds, and intervening in the foreign currency market. The Bank of Israel began raising interest rates in the summer of 2009 when inflation rose above the upper end of the Bank's target and the economy began to show signs of recovery. Israel has partially weathered the 2010 economic crisis. In addition, an FX intervention scheme was announced in May 2013 aimed at neutralizing the impact of natural gas on the current account. Complementary to the above, the MOF has introduced a capital gains and withholding tax on transactions on local short-term debt. Overall, the ILS continues to enjoy its status of safe-haven currency in EMEA, but the FX intervention risk on the part of the central bank remains elevated.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 25%
- **Capital gains:** Capital gains are subject to the same corporate income tax rate
- **Withholding tax**
 - **On dividends:** A WHT of 25% is levied on dividends when the shareholding is less than 10%. A WHT of 30% is levied when the shareholding is equal to or more than 10%. A WHT of 20% is levied when the payer is an Israeli resident company of which the shares are listed for trading on a stock exchange
 - **On interest:** 25%

REGULATION AND REPATRIATION

- All capital transactions must be notified to the Central Bank
- Local and international cash pooling allowed
- Holding foreign currency in onshore accounts is allowed
- Holding ILS in offshore accounts is allowed

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

POLAND – PLN

(NEW POLISH ZLOTY) Deliverable **Yes** Convertible **Yes**

The Polish Zloty has been a free-floating currency since April 2000. Since 1999, the objective of the National Bank of Poland (NBP) has been to maintain price stability. At the beginning of 2004, the NBP moved to continuous CPI inflation targeting at the level of 2.5% with a maximum permissible deviation of +/-1%. The main instrument of monetary policy is the reference rate which sets the minimum yield on the NBP's 7-day money market bills. The official plan to join the Eurozone in 2012 had to be shelved and there is no new official target date. The Polish economy is more resilient to external shocks than its neighbors as it is a less open economy, more driven by domestic demand.

ROMANIA – RON

(ROMANIAN LEU) Deliverable Yes Convertible Yes

Romania joined the EU on 1 January 2007. Domestic consumption and investment have fueled strong GDP growth in recent years, but have led to large current account imbalances. Romania's GDP fell more than 7% in 2009, prompting Bucharest to seek an emergency assistance package from the international lenders. Drastic austerity measures led to a further 1.9% GDP contraction in 2010. In 2011, export performance and signs of stabilization in private demand were better than expected and GDP returned to positive growth. Nevertheless, the higher inflation risks materialized. Further fiscal consolidation will be needed to bring down budget deficit within target. Romania has made significant progress in recent years in restoring macroeconomic stability by reining in large external and fiscal shortfalls to sustainable levels. However, the economic recovery has been fragile and remains hampered by weak domestic demand.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 16%
- **Capital gains:** Treated as ordinary business income and taxed at normal corporate rate
- **Withholding tax**
 - **On dividends:** 16% unless the rate is reduced under a tax treaty or the EU parent-subsidiary directive. Dividends paid by a Romanian legal person to a legal person resident in another EU/EFTA member state or to a permanent establishment of a company from an EU/EFTA member state are subject to a 16% WTT if the dividends do not qualify for an exemption under the parent-subsidiary directive
 - **On interest:** The following types of interest payments to non-resident companies are exempt from both income and WHT:
 - Interest on Romanian government or municipal bonds issued on domestic or international securities markets
 - Interest on bonds issued by the Romanian National Bank
 - Interest paid to a pension fund located in an EEA country, as defined according to the legislation of that country
 - Any other type of interest paid to non-resident companies is subject to a 16% final withholding tax, unless a lower treaty rate applies

REGULATION AND REPATRIATION

- All capital transactions must be notified to the Central Bank
- Payments are allowed between residents, and also between residents and non-residents (spot and derivatives)
- Payments in hard currencies (EUR/USD) not allowed between residents
- Capital account fully liberalized
- FX payments are allowed between residents and non-residents, based on documentation (commercial contracts)
- For non-residents investing in Romania, there are no restrictions with the repatriation of profits and capital
- Local and international cash pooling is allowed. The concept of cash pooling is not currently subject to a specific regulation under Romanian legislation, nevertheless, as per contractual freedom principle, cash pooling arrangements should be considered valid from legal perspective.

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

SERBIA – RSD

(SERBIAN DINAR) Deliverable **Yes** Convertible **Yes**

Serbia continues to make progress in its towards greater integration with the European Union. The Stabilization and Association Agreement is enforce with the EU and by January 2014, Serbia is expected to begin negotiations with the EU concerning future membership, as it is an officially candidate. Economic reforms are expected to continue which should lead to greater liberalization of many parts of the economy, along with making it a more attractive investment and business destination.

REGULATION AND TAX TREATMENT

TAXATION

Corporate income tax:

- **Residence:** a legal entity is considered resident if it is incorporated in Serbia or managed or controlled in Serbia
- **Taxable income:** includes both business income and capital gains.
- **Corporate income tax:** now 15% (increased from 10%) for residents and 20% for non residents
- **Transfer tax:** 2.5% on value of real estate, intellectual property
- **Capital gains:** Capital gains are taxable together with other income and taxed at a normal corporate rate
- **Withholding tax**
 - Withholding tax on dividends, interest and royalties is 20% unless a lower treaty rate applies

REGULATION AND REPATRIATION

- No ceiling for foreign investments; Only in case of purchase of joint stock companies, pursuant to the Law on the Takeover of Joint Stock Companies, a 25% voting stocks acquisition ceiling of the target company is applied, and a related consent of the Securities Commission is required.
- Foreign Exchange Control: Foreign exchange control is regulated by the Law on Foreign Exchange Transactions;
 - a) Payments related to commercial transactions need to be documented
 - b) Capital transactions related to credits and loans with nonresident have to be registered with National bank of Serbia

- c) OTC Financial derivatives transactions for residents are allowed for hedging needs only. Banks are allowed to do financial derivatives transactions without limitations.
- The Law of Foreign Exchange Operations regulates payments in foreign currency between residents and non-residents and between residents in the Republic whereby:
 - a) Payments between residents are allowed but restricted only to the sale, purchase and lease of real estate
 - b) Payments between residents and non-residents are allowed upon submission of commercial documentation, i.e. cross-border contract
 - c) no transfer restrictions for nonresidents on income and capital after tax clearance
 - d) transfer of receivables or liabilities between residents and non residents is allowed
- Cross border financing to Serbia: Allowed: being understood that all loans and credits have to be registered with the NBS; restrictions relative to financial loan/credit regarding repayments: no restrictions if implemented for importation purposes, but if for other purposes (i.e. inland in dinars), the loan may be repaid only after the expiry of the period of one year from the date of use, and in case the loan is repaid in several tranches, the repayment may begin only after the expiry of a 6-month period from the date of each use of the respective loan.
- For transfer of funds abroad from the account of non-residents, required proof of settlement of tax liabilities under a specific operation in the Republic.
- No international cash pooling while domestic cash pooling is allowed

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

TURKEY – TRY

(TURKISH LIRA) Deliverable **Yes** Convertible **Yes**

In 2001, Turkey abandoned its crawling peg system and allowed the Turkish lira to float freely with occasional intervention by the CBRT. After Turkey experienced a severe financial crisis in 2001, Ankara adopted financial and fiscal reforms as part of an IMF program. The reforms strengthened the country's economic fundamentals and ushered in an era of strong growth. The credibility of the policy framework has strengthened considerably over recent years, both on the monetary and fiscal sides. In addition, Turkey continues to enjoy measured economic growth but faces geopolitical regional risk. The main policy challenges come from the large current account deficit, together with persistently high inflation.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 20%
- **Capital gains:** 75% (100% for leasing) of the capital gain realized on the sale of participation/founder's/preferred shares and priority rights in another company or of immovable property is exempt from CIT, subject to conditions
- **Withholding tax**
 - **On dividends:** 5% for Distribution to non-resident companies (similar to local corporates 'AS' or 'Ltd S'), out of foreign-source capital gains and dividends qualifying for domestic exemption.
 - **On interest:** For non-resident companies - unless a treaty provides for a lower rate - a rate of 0% applies to: interest on Turkish government bonds and debentures, on bonds and debentures issued by companies, on loan paid to foreign banks, states, international institutions, on loan paid to other companies authorized to provide loans in the country in which they are established and provide loans to related companies, individuals, legal entities. 10% for interest from debentures received by non-resident companies directly from the issuing companies. However, interest received by non-resident companies from debentures issued by resident companies abroad is subject to different withholding tax rates (from 0% to 10%) depending on debentures maturity date. These WHT rates are applicable to income received by non-resident from Ijara certificates (sukuk) issued

abroad by resident asset lease companies. A rate of 10% applies to discount proceeds on all sorts of bonds. A rate of 15% applies to income from repo transactions concerning government bonds and debentures. WHT at rate of 1% is levied on interest paid by banks on subordinated loans similar to equity and interest paid by banks and other companies on loans taken by way of securitization abroad. A rate of 5% applies to interest in relation to the sale of goods on credit. Interest income on deposit accounts (except interest paid between resident banks), profit shares received from interest-free loans and profit shares received from profit/loss partnership certificates is subject to different income WHT rates (10%, 12% or 15%) depending on the maturity of such accounts. In the case where the interest is derived from foreign currency accounts and profit shares, the aforementioned WHT rates are set as 13%, 15% and 18% respectively

REGULATION AND REPATRIATION

- Importation of FX is free. There is no restrictions on foreign portfolio investments in Turkey. Repatriation of proceeds is free
- The Central Bank's key duties: Carrying out open market transactions, conducting, rediscounting and advance transactions, monitoring the financial markets, managing Gold and FX reserves

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

RUSSIA & CIS

EMERGING STRATEGY OUTLOOK

RUSSIA & CIS

The eye of the
hurricane

Societe Generale Emerging Strategy

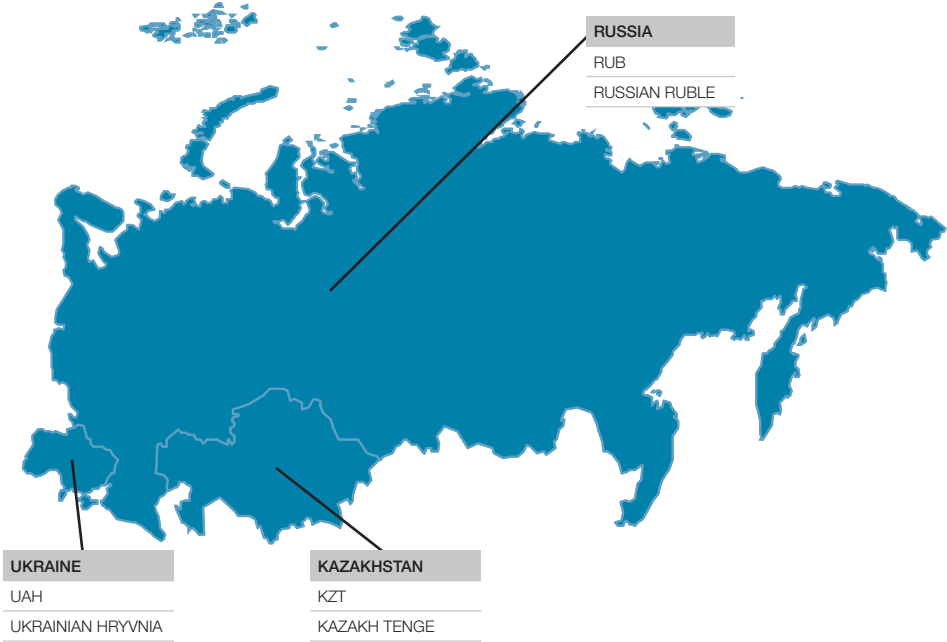

The region will remain under investors' scrutiny this year with the ongoing conflict between Russia and Ukraine, and the impact of lower oil prices. The deterioration of the geopolitical crisis will have negative repercussions for the region as a whole. Another source of instability for the region is the economic situation in Ukraine. The country stands out as the most vulnerable EM country from an external, domestic or macro-economic viewpoint, and is facing strong funding needs. The region also remains vulnerable to falling oil prices, which is one additional source of macro risk.

In Russia, the macro-economic performance nose-dived last year, reflecting the impact of a major plunge in oil prices, alongside ongoing Western sanctions, escalation in the crisis with Ukraine, frail emerging markets investor sentiment and soaring inflation. We believe that officials' policy signals will be important to restoring investor confidence. The removal of the December emergency rate hike may proceed at a gradual pace to soften the impending recession despite rising inflation. We expect the year-end policy rates to reach 11.00%.

In Ukraine, the ongoing conflict with Russia has critically worsened the economic situation and we argue that the latter is unlikely to evolve positively with the country likely to remain in recession throughout this year. Additionally, the funding from the IMF and the EU is going to be conditional to the implementation of an extensive debt restructuring.

In Kazakhstan, the economy will continue to be driven by the oil price action and the recession of the Russian economy. With the oil and gas industry accounting for a quarter of the country's GDP, the oil price drop will have a major impact on exports and fiscal revenues. On the other hand, the economy's trajectory will remain highly conditional to the Russian economy due to the trade union signed in 2010 and the strong import and export links between the two countries. In addition, the poor quality of the bank sector will remain a challenge for the country this year with a high percentage of non-performing loans and a low profitability of the banking industry.

RUSSIA – RUB

(RUSSIAN ROUBLE) Deliverable **Yes** Convertible **Yes**

The reliance on commodity exports makes Russia vulnerable to boom and bust cycles that follow the highly volatile swings in global commodity prices. The economy had averaged 7% growth since the 1998 Russian financial crisis, resulting in a doubling of real disposable incomes and the emergence of a middle class. The Russian economy, however, was one of the hardest hit by the 2008-09 global economic crisis as oil prices plummeted and the foreign credits that Russian banks and firms relied on dried up. The Central Bank of Russia spent one-third of its \$600 billion international reserves in late 2008 to slow the devaluation of the ruble. The economic decline bottomed out in mid-2009 and the economy began to grow in the first quarter of 2010. High oil prices buoyed Russian growth in the first quarter of 2011 and could help Russia reduce the budget deficit inherited from the lean years of 2008-09, but inflation and increased government expenditures may limit the positive impact of these revenues. The RUB is managed against a band set against the EUR(45)-USD(55) basket which should be abandoned in 2015 according to CBR for policy move to inflation targeting policy. In recent weeks, the central bank had to step up its intervention after the RUB came under pressure in the context of the Ukraine crisis and fall in oil prices.

USD/RUB SPOT

POLICY RATE

HOLIDAYS IN 2015 (Source Bloomberg)

1/2/7 Jan, 23 Feb, 9 Mar, 1/11 May, 12 Jun, 31 Dec

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 20%. This is a combined rate, which consists of two parts: federal (2%) and regional (18%). Regional authorities may decrease the regional part of the CIT rate by up to 4.5% points for some categories of taxpayers. As such, the minimum rate of CIT paid to regional budgets is 13.5%
- **Capital gains:** Capital gains arising from the disposal of shares in Russian companies owned for more than 5 years at the date of alienation are exempt from CIT, under certain conditions
- **Withholding tax**
 - **On dividends:** A 15% WHT is levied on dividends unless a lower treaty rate applies
 - **On interest:** A 20% WHT is levied on interests unless a lower treaty rate applies. Interest on state and municipal securities is taxed at the general rate of 15%, and no withholding tax is levied on interest from state or municipal securities issued prior to 20 January 1997 and from certain other securities issued by the state for the purpose of safeguarding foreign currency reserves. Interest on mortgage bonds and long-term (at least 3 years) municipal bonds issued prior to 1 January 2007 is taxable at a 9% withholding tax rate

REGULATION AND REPATRIATION

- Non-residents can make cross-border transfers of rubles and foreign currencies to and from accounts with Russian banks without restrictions.
- Cross-Border payment on certain type of transactions defined by the Central Bank of the Russian Federation will require from a Russian resident a Deal Passport giving information about the transaction and schedule and purposes of the payment. The requirement for a Deal Passport is not applicable to derivative transactions.

LEGAL AND DOCUMENTATION

- A new standardized form of model provisions and agreement for derivative transactions was developed in 2011 by three Russian professional bodies based on the ISDA Model and was approved by the Russian regulator on financial markets. It is commonly referred to as "RISDA" or "Russian ISDA"
- This is the mandatory document to be used for derivative transactions concluded in Russia between two Russian counterparties in order to enforce close-out netting provisions. It contains a certain number of provisions which are similar to English law ISDAs.
- The Russian parliament adopted new provisions designed to introduce the concept and enforceability of close out netting provisions in Russian law, which came into force in August 2011. This brought Russian law on financial markets closer to international standards

REGULATORY REFORMS

- A number of key rules and regulations have already been reviewed or introduced in the last few years. Derivative transactions are subject to a certain number of laws and regulations
- The concept of a 'derivative' covers (a) transactions linked to commodities, securities, FX and interest rates, rates of inflation, derivatives and statistical information as well as weather and credit derivatives and other transactions where payments depend on the

occurrence or non-occurrence of another event provided for in the legislation or regulations extending that list of eligible underlying assets; (b) call and put options; and (c) transactions providing for the transfer of securities, cash or commodities to the other party not earlier than the third day after the trade date provided that the transaction documentation indicates that such a transaction is a derivative

- Deliverable FX, commodities and securities forwards and deliverable FX swaps are not derivatives unless otherwise designated
- In order to be eligible for close-out netting a derivative transaction may be entered between a Russian corporate client, on the one hand, and a Russian bank or a Russian professional participant on securities market or CBR or a foreign bank or foreign Central bank or International Financial Organization. In order to meet the provisions of the Civil Code of the Russian Federation in relation to the enforceability of claims under derivative transactions governed by Russian law in case if one counterparty is a Russian corporate client, the other counterparty must be a legal entity, that received a license for banking transactions or license for professional activities on securities market
- Foreign exchange transactions that are not derivatives can be only settled through a Russian bank that has a license for transactions in foreign currencies. Derivative transactions if such transaction implicates the settlement in foreign currency can only be contracted between two Russian residents if at least one of these two Russian residents is a Russian bank that has a license for transactions in foreign currencies or a professional participant on securities market
- Societe Generale offers offshore derivatives and onshore ones through its local subsidiary Rosbank

MONETARY POLICY

- To improve the effectiveness of monetary policy, the Bank of Russia will continue to move towards a free floating exchange rate, without obstructing rouble exchange rate dynamics, based on fundamental macroeconomic factors. At the same time, it will retain its presence on the domestic foreign exchange market in order to mitigate excessive fluctuations in the rouble value of the bi-currency basket
- The two most important policy rates currently are CBR's deposit and auction repo rates. These two rates determine the interest rate corridor for short-term money market
- When liquidity is abundant and the banking system is a net lender money market rates fluctuate around deposit rate
- On the opposite when banks have to resort to CBR to replenish liquidity interbank rates gravitate towards auction repo rate

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

KAZAKHSTAN – KZT

(KAZAKH TENGE) Deliverable **No** Convertible **Yes**

From 2000 till 2007, Kazakhstan's economy grew more than 9% per year. At the end of 2007, global financial markets froze up and the loss of capital inflows to Kazakhstani banks caused a credit crunch. The subsequent and sharp fall of oil and commodity prices in 2008 aggravated the economic situation, and Kazakhstan plunged into recession. In response to the crisis, Kazakhstan's government devalued the Tenge to stabilize market pressures and injected \$19 billion in economic stimulus. A large devaluation of the KZT (of almost 20%) was engineered by the authorities in February 2014, but since then the KZT has been stable.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 20%
- **Capital gains:** exemptions of CIT on capital gains derived from the disposal of shares exist, under certain conditions
- **Withholding tax**
 - **On dividends:** Exemption applies to a non-resident company holding securities or participations in a resident company for a minimum period of 3 years, unless the non-resident is a subsurface user or is established in a low-tax jurisdiction.
 - The WHT rate on dividends paid to non-residents established in a low-tax jurisdiction is 20%.
 - **On interest:** A 20% WHT is levied on interest paid to non-residents established in a low-tax jurisdiction

REGULATION AND REPATRIATION

- Companies can enter FX transactions only via authorized banks
- Non-residents must specify the purpose for executing FX transactions involving KZT

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

UKRAINE – UAH

(UKRAINIAN HRYVNIA) Deliverable **No** Convertible **Partial**

Real GDP growth exceeded 7% in 2006-07, fueled by high global prices for steel - Ukraine's top export - and by strong domestic consumption. Ukraine reached an agreement with the IMF for a \$16.4 billion Stand-By Arrangement in 2008 to deal with the economic crisis, but the Ukrainian Government's lack of progress in implementing reforms has twice delayed the release of IMF assistance funds. The drop in steel prices and Ukraine's exposure to the global financial crisis due to aggressive foreign borrowing lowered growth in 2008 and the economy contracted more than 15% in 2009, among the worst economic performances in the world; growth resumed in 2010, buoyed by exports. The Ukrainian economy has been in recession since mid-2012, and the outlook remains challenging in the period ahead, with severe risks to financial stability. The outbreak of the Ukraine crisis has further compounded the overall situation, triggering a severe correction in UAH. Going forward, the Ukrainian authorities will need to secure some external financing in order to contain financial stability risks.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** From 1 January 2014, CIT is levied at a flat rate of 18%. A 0% rate applies to insurance companies for long-term insurance and pension insurance contracts for non-state pension system purposes. A 3% rate applies to insurance companies for income from other types of insurance than those subject to the 0% rate
- **Capital gains:** Capital gains are included in the CIT base and taxed at the general CIT rate (capital gains from the disposal of securities and participation rights are subject to the general 18% CIT rate)
- **Withholding tax**
 - **On dividends:** A WHT of 15% is levied on dividends paid to non residents unless a lower treaty rate applies
 - **On interest:** A WHT of 15% is levied on interest. However interest

on government securities issued abroad through authorized non-resident agents and interest on loans granted to the government or the National Bank is exempt from Ukrainian Tax

REGULATION AND REPATRIATION

- No requirements to convert foreign currency export proceeds
- Time limit for foreign currency settlements on export and import transactions recently extended from 90 to 180 days
- Foreign investors are entitled to repatriate profit, income or other funds relating to investments without any restrictions, after the payment of applicable taxes.
- Although not strictly required under the law, registration of the foreign investment may reduce complications in the future (withdrawal of capital, for example)

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

MIDDLE EAST

EMERGING STRATEGY OUTLOOK

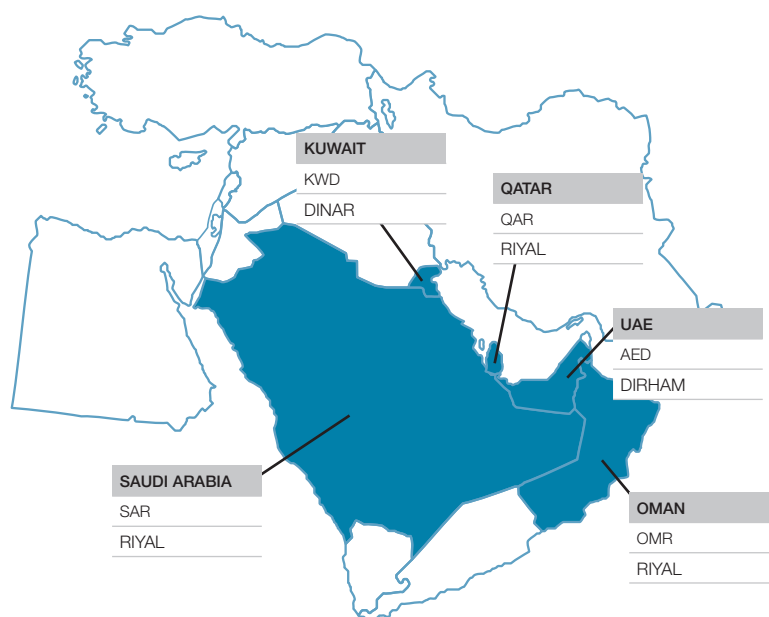

THE MIDDLE EAST

A zone of resilience

Societe Generale Emerging Strategy

The region continues to show signs of improvement in fundamentals as well as resilience to the turbulence in global emerging markets. The Middle East's market focus is mainly about Sovereign Credit due to the underdeveloped local rates markets and pegged exchange rates. We expect growth to pick up markedly in the region this year (7.7% GDP growth expected in Qatar in 2015, +4.5% in UAE, +2.9% in Bahrain). Nevertheless, the region remains exposed to global risks, in particular falling oil prices, and we believe that some differentiation needs to be applied between the countries as they are facing this risk from different starting points. Bahrain seems to be the most vulnerable country in the region in the context of lower oil prices with a weak fiscal position (-5.7% of the GDP) and a high level of external debt (close to 100% of the GDP), together with a challenging political backdrop. At the other end of the spectrum, the situation in Qatar, U.A.E. and Saudi Arabia is considerably more comfortable; fundamentals are stronger with the fiscal position being quite robust. Going forward, the outlook may improve if the oil price stages a bounce in the latter part of the year, as expected by our Commodities research.

KUWAIT – KWD

(KUWAITI DINAR) Deliverable Yes Convertible Yes

In 2003 Kuwait pegged KWD to USD under a flexible peg. Four years later KWD re-pegged to an undisclosed weighted basket of currencies. Central Bank of Kuwait's policy for the KWD exchange rate aims at enhancing the relative stability of the KWD against other currencies especially the USD, and shields the domestic economy against the effects of imported inflation. This reflects the importance of the exchange rate policy in the Kuwaiti economy where there are no restrictions on the movement of funds. At the start of 2003 it switched to a USD peg at KWD0.29963:USD1 with a $\pm 3.5\%$ band (KWD0.28914- 0,31011), to align Kuwait with the other Gulf States, in preparation for the planned introduction of a single currency in 2010. However, this deadline has now passed without the project coming to fruition. There is no clarity on a new timeframe for the plans. In May 2007, the CBK reverted to a currency basket regime, which began trading at a rate of KWD0.28806. The composition of the basket has not been disclosed but it is USDheavy and officials report that it reflects Kuwait's trade and capital account flows. The authorities remain fully committed to the current exchange regime, and the country enjoys strong fundamentals. Given the dependency on oil, the main risk to the economy would be a sustained decline in oil prices.

REGULATION AND TAX TREATMENT

TAXATION

- Corporate income tax:** 15%
- Capital gains:** Taxed as ordinary income at normal corporate rate
- Withholding tax**
 - On dividends:** A 15% WHT is levied on dividends paid to foreign entities by investment companies, banks managing portfolios, custodians and funds
 - On interest:** A 5% retention tax is deducted by the payer of the income. The 5% tax is retained by the income payer and released to the income beneficiary only once the beneficiary has provided a Tax Clearance Certificate (TCC) issued by the Kuwait Tax Authority

REGULATION AND REPATRIATION

- FX market liquidity is traded Onshore/Offshore
- There are no restrictions on current or capital account transactions in Kuwait beyond the requirement that all foreign exchange purchases be made through a bank or licensed foreign exchange dealer
- No limitations on the repatriation of income, capital gains and capital

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

QATAR – QAR

(QATARI RIYAL) Deliverable Yes Convertible Yes

Despite the global financial crisis, Qatar has prospered in the last several years - in 2010 Qatar had the world's highest growth rate. Qatari authorities throughout the crisis sought to protect the local banking sector with direct investments into domestic banks. GDP rebounded in 2010 largely due to the increase in oil prices. Economic policy is focused on developing Qatar's non-associated natural gas reserves and increasing private and foreign investment in non-energy sectors. The country continues to enjoy strong macro performance, including growth well above 5%, large fiscal surplus and solid external accounts. The spot has not moved much and the parity stayed most of the times inside the range of [3.6360 – 3.6420] during the last years.

REGULATION AND TAX TREATMENT

TAXATION

- Corporate income tax:** flat rate of 10%
- Capital gains:** Taxed as ordinary income at normal corporate rate
- Withholding tax**
 - On dividends:** No WHT is levied on dividends paid to non-resident companies when paid out of profits that were subject to tax or that are exempt from tax under a Qatari law
 - On interest:** A 7% WHT is levied on interest paid to non-resident. Exemptions apply to interest on deposits in banks in the state, interest on bonds and securities (issued by the state and public authorities, establishments and corporations owned wholly or partly by the state), interest on transactions, facilities and loans with banks and financial institutions and interest paid by a permanent establishment in the state to the head office or to any entity related to the head office outside Qatar

REGULATION AND REPATRIATION

- The QCB buys USD at 3.6385 and sells at 3.6415
- FX market liquidity is traded onshore/offshore
- No foreign exchange control, however the Central Bank oversees the operations in the market
- Qatar Central Bank objectives: Stability in the QAR exchange rate and its free convertibility to other currencies. Financial stability
- Qatar Central Bank functions: Manage and conduct operations related to exchange rate policy. Supervise and control the activities of financial institutions, i.e. banks, exchange houses, investment companies, financial companies and representative offices

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

SULTANATE OF OMAN – OMR

(OMANI RIAL) Deliverable **Yes** Convertible **Yes**

Given oil reserves' decline, Muscat has actively pursued a development plan that focuses on diversification, industrialization, and privatization. OMR has been pegged at OMR0.3850:USD1 since January 1986. The exchange rate peg remains an appropriate anchor for monetary policy and has served the country well, as reflected in the strong macro fundamentals. The spot hasn't moved much and the parity stayed most of the times inside the range of [0.3840 – 0.3855] during the last years.

SAUDI ARABIA – SAR

(SAUDI RIYAL) Deliverable **Yes** Convertible **Yes**

The Saudi riyal has been pegged at 3.75 to the US dollar since June 1986. The SAR has been managed against the USD— either at a fixed parity or a steady crawl—for most of the past 30 years. It was also pegged to the dollar and re-valued several times during the 1970s, then allowed to depreciate gradually during the early 1980s as oil prices fell. The riyal is today fully convertible and is the most liquid of the Middle Eastern currencies. The authorities remain fully committed to the pegged exchange rate, which has served the country well. The spot hasn't moved much and the parity stayed most of the times inside the range of [3.7400 – 3.7600] during the last years.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax: 20%**
- **Capital gains:** Capital gains are subject to tax as part of total income at the standard rate of 20%. Capital gains on securities traded on the stock market in Saudi Arabia are exempt from tax if the securities came into existence on or after 30 July 2004 and the transfer is effected in accordance with the provisions of the stock market regulations
- **Withholding tax**
 - **On dividends:** A WHT of 5% is levied on dividends unless a lower treaty rate applies
 - **On interest:** As the regulations do not provide any definition for the term "income from loans", it can be assumed that it means any amount paid or accrued under a debt obligation. Exemption applies to interest payments related to bank deposits

REGULATION AND REPATRIATION

- The Saudi Arabian Monetary Agency (SAMA) has a mandate to promote and maintain domestic-price and exchange rate stability
- All applications, for the grant of licenses to carry on banking business in the Kingdom, shall be addressed to the Agency which will study the applications after obtaining all the necessary information and submit its recommendations to the Minister of Finance and National Economy
- Every money-changer shall maintain on a permanent basis the cash reserve specified for him by the Saudi Arabian Monetary Agency, provided it should be a percentage of his capital and reserves and should be deposited with the bank prescribed by SAMA. The use of this reserve shall be subjected to the restrictions and instructions issued by the Agency

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

UAE – AED

(UAE DIRHAM) Deliverable **Yes** Convertible **Yes**

The global financial crisis, tight international credit, and deflated asset prices constricted the economy in 2009 and 2010. UAE authorities tried to blunt the crisis by increasing spending and boosting liquidity in the banking sector. The crisis hit Dubai hardest, as it was heavily exposed to depressed real estate prices. Dubai lacked sufficient cash to meet its debt obligations, prompting global concern about its solvency. The UAE Central Bank and Abu Dhabi-based banks bought the largest shares. The economy is expected to continue a slow rebound. Dependence on oil, a large expatriate workforce, and growing inflation pressures are significant long-term challenges, but it now appears that the days of Dubai sovereign debt woes are over. Looking ahead, growth in the coming years will benefit from a number of megaprojects and Dubai's successful bid for the Expo 2020. The spot hasn't moved much and the parity stayed most of the times inside the range of [3.6700 – 3.6740] during the last years.

AFRICA

EMERGING STRATEGY OUTLOOK

AFRICA

A challenging
year ahead

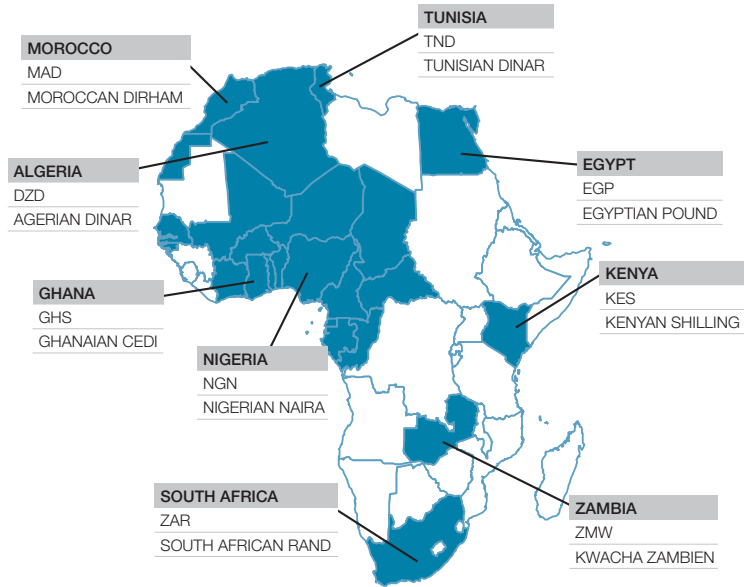

Societe Generale Emerging Strategy

Africa continues to be a continent of opportunities for investors due to its high-yielding profile, robust growth and resilient vulnerability profile, in our view. Furthermore, African markets remain less correlated with global markets than other EM markets, which shield them from risk aversion shocks. Most African currencies severely weakened in 2014 and in early 2015, but we remain constructive on the region given the attractive valuations.

In Nigeria, we believe that 2015 will be challenging for the country. Annual growth is likely to lose steam (to 5.0% yoy from 7.0% yoy in 2014, according to the IMF), and the impact of the Presidential election and significant security concerns pose distinct challenges for Nigeria's outlook. However, Nigeria continues to boast a resilient vulnerability profile, including its strong external sector and debt positions.

In Ghana, we expect stabilization in the cedi this year after heavy losses in 2014. The economy is showing signs of a mild recovery and we believe that a successful deal with the IMF and stabilizing oil prices will restore financial stability and lead to renewed capital inflows.

ALGERIA – DZD

(ALGERIAN DINAR) Deliverable **No** Convertible **Partial**

Gradual liberalization since the mid-1990s has opened up more of the economy, but recently Algeria has imposed new restrictions on foreign involvement and halted privatization of state-owned industries. Thanks to hydrocarbon revenues, Algeria has a cushion in foreign currency reserves and a large hydrocarbon stabilization fund.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 25% for trading and services activities; 25% for mixed activities when the revenue derived from trading and services exceeds 50% of total revenue and 5% for investment capital companies (sociétés de capital investissement) under certain conditions
- **Capital gains:** Taxed as the normal CIT rate. A distinction is made between long-term and short-term capital gains. Gains realized on the partial transfer of business assets held for more than 3 years are deemed as long-term capital gains. Capital gains on the disposal of the following financial assets are exempt for a 5-year period from 1 January 2014: shares, bonds and similar securities listed on the stock exchange under certain conditions
- **Withholding tax**
 - **On dividends:** A WHT of 15% is levied on dividends
 - **On interest:** A WHT of 10% is levied on interest. However a 40% WHT is applicable to bearer securities

REGULATION AND REPATRIATION

- The Bank of Algeria manages Algeria's foreign reserves and controls foreign exchange
- Foreign investors can repatriate dividends, profits, and real net income out of their assets through transfers or liquidation with CBK approval

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

EGYPT – EGP

(EGYPTIAN POUND) Deliverable Partial Convertible Partial

In theory, the Egyptian pound has floated freely since 2003. However, the Central Bank does intervene to prevent major volatility against the USD. Cairo from 2004 to 2008 pursued economic reforms to attract foreign investment and facilitate growth. In 2010, change of government occurred following the 'arab spring'. Since 2010, the country has experienced political instability, as the Muslim Brotherhood took power and then lost it back to the Military. Overall, the political outlook remains fragile.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** Companies that are engaged in the exploration and production of oil and gas are taxed at a rate of 40.55%. Otherwise, a progressive rate of corporate tax is applied at 25% for income below EGP 10 million and 25% for income exceeding that amount
- **Capital gains:** Capital gains derived by companies and partnerships on securities listed on the Egyptian stock exchange are not subject to tax
- **Withholding tax**
 - **On dividends:** No withholding tax is levied on dividends distributed by resident companies
 - **On interest:** A 35% WHT is levied on interest on government bonds issued by the Ministry of Finance on behalf of the central bank

REGULATION AND REPATRIATION

- Exchange rate policy and supervision is conducted by the Central Bank of Egypt which is also responsible for implementing monetary policy
- The Monetary Policy Committee was created in 2005. Its main objective is to introduce transparency into interest rate policy.
- EGP may be sold/bought by offshore banks only through authorized agents.
- There are no restrictions on foreign investment or profit repatriation

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

GHANA – GHS

(GHANAIAN CEDI) Deliverable **Partial** Convertible **Yes**

Gold and cocoa production are major sources of foreign exchange. Oil production, which commenced in 2010, became a new source of revenue as well. In 2009, Ghana signed a three-year Poverty Reduction and Growth Facility with IMF to improve macroeconomic stability, private sector competitiveness, human resource development, and good governance. Sound macro-economic management along with high prices for gold and cocoa helped sustain GDP growth in 2008-10. In order to support economic recovery in early 2010, priorities of Government were reduction of inflation, current account and budget deficits. Late 2010 saw the onset of new oil output. Oil production has continued to increase in the last few years, and has become an even bigger contributor to the government finances. China investments in Ghana have also increased significantly (overtaking the World Bank as a lender). As highlighted by the IMF in September 2013, a large current account deficit (due to lower gold and cocoa prices) is the main economic risk going forward.

REGULATION AND TAX TREATMENT

TAXATION

- Corporate income tax:** Special tax rates do apply to some business sector (e.g. income from loans to leasing companies are taxed at a 20% CIT rate)
- Capital gains:** Chargeable assets do not include securities listed on the Ghana Stock Exchange up until 2015 and trading stock and certain depreciable assets
- Withholding tax**
 - On dividends:** Dividends distributed by companies established in free zones to non-resident corporate shareholders are exempt from WHT
 - On interest:** A WHT of 8% is levied on interest

REGULATION AND REPATRIATION

- Exchange controls exist for imports/exports and also for repatriation of capital, profits, royalties, interest, fees and income
- Repatriation of funds or dividends and payments in foreign currency to or from Ghana between a resident and a non-resident, or between non-residents, must be made through authorized dealer bank. There are no exchange control or currency regulations, as long as the transaction is effected through these banks
- Transfers of profits, interest and fees are free for investors under the Ghana Investment Promotion Centre Act
- Expatriates may transfer only a quota of their annual revenue

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

KENYA – KES

(KENYAN SHILLING) Deliverable **Partial** Convertible **Yes**

In 2006 the World Bank and IMF delayed loans because of the government corruption issues. Post-election violence in early 2008, coupled with the effects of the global financial crisis on remittance and exports, reduced GDP growth to 1.7 in 2008, but the economy rebounded in 2009-10. Kenya has been resilient to the global crisis, attracting more interest from investors. However, the political situation is a source of concern and represents a risk.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** The CIT rate is 30%. Different rates apply where the company is a newly listed company under certain conditions
- **Capital gains:** Capital gains are taxable at the rate of 5%
- **Withholding tax**
 - **On dividends:** Dividends paid to a non-resident company are subject to withholding tax at the rate of 10% on gross dividends paid
 - **On interest:** A 25% WHT is levied on interest from bearer instruments and a 15% WHT applies in all other cases

REGULATION AND REPATRIATION

- All foreign exchange transactions over USD 10,000 must be notified to the Central Bank
- The 1964 Foreign Investments Protection Act authorizes Kenya's Finance Minister to issue Certificates of Approved Status. These certificates guarantee foreign investors the right to repatriate profits after deduction of taxes and dividends
- In theory, the Kenyan Government allows profits to be repatriated annually. In practice, because of chronic foreign exchange shortages, repatriation of dividends is usually delayed

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

MOROCCO – MAD

(MOROCCAN DIRHAM) Deliverable **Yes** Convertible **Yes**

Managed floating currency

Morocco's trade and budget deficits widened in 2010. MAD has been conventionally pegged against a composite basket including Euro and USD. The currency peg has been successful in keeping inflation low at 1,4% in 2011. Morocco GDP has been growing over 4% for the last two years. Morocco has safely navigated through the Arab Spring so far, maintaining its status of safe haven in North Africa. In 2013, the governor of Morocco's Central bank indicated he expected to transition through a more flexible currency regime over the next 3 years.

TAXATION

- **Corporate income tax:** The standard tax rate is 30%. A 37% rate applies to credit institutions, leasing companies, the Bank Al Maghreb, the Deposit Bank and to insurance and reinsurance companies
- **Capital gains:** capital gains by resident companies are included in their taxable base and are subject to the standard CIT rate
- **Tax withheld at source**
 - **WHT dividends:** A 15% WHT is levied on dividends distributed by resident companies, regardless of the residence status of the recipient, unless a lower treaty rate applies
 - **WHT interest:** A 10% WHT is levied on interest derived by non-resident legal persons, unless a lower treaty rate applies

REGULATION AND REPATRIATION

- No foreign exchange control

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

NIGERIA – NGN

(NIGERIAN NAIRA) Deliverable **Partial Convertible Partial**

Managed floating currency

Oil-rich Nigeria has been hobbled by political instability, inadequate infrastructure, but in 2008 began pursuing economic reforms. Nigeria pulled out of its IMF program in April 2002, after failing to meet spending and exchange rate targets. Since 2008 the government has begun to show the political will to implement the market-oriented reforms urged by the IMF, such as modernizing the banking system, curbing inflation, and resolving regional disputes over the distribution of earnings from the oil industry. GDP rose strongly in 2007-10 because of increased oil exports and high global crude prices in 2010. The Nigerian economy was resilient to the global crisis in 2010-12, and has since then continued to attract huge interest, from investors and corporates. However, the resurgence of terrorist activities might become a threat to foreign investment and political stability.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** The standard CIT rate is 30%. Other lower tax rate may apply under conditions
- **Capital gains:** 10%
- **Withholding tax**
 - **On dividends:** The rate is reduced to 7.5% when the beneficiary company is based in a country which has a tax treaty in force with Nigeria. Exemption applies on dividends distributed by unit trusts
 - **On interest:** A WHT of 10% is levied on interest. The rate is reduced to 7.5% when the beneficiary company is based in a country which has a tax treaty in force with Nigeria. Exemptions apply to interest on deposit accounts of non-resident companies and interest on corporate and government bonds from tax

REGULATION AND REPATRIATION

- Equity share capital can only be brought into Nigeria via authorized banks
- The remittance of dividends is allowed as long as the share equity is imported
- The remittance of interest and royalties are allowed as long as the National Office for Technology, Acquisition and Promotion has approved
- Capital, profits and interest can be repatriated
- Equal access to local securities for domestic and foreign investors

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

SOUTH AFRICA – ZAR

(SOUTH AFRICAN RAND) Deliverable **Yes** Convertible **Yes**

Growth was robust from 2004 to 2007 as South Africa reaped the benefits of macroeconomic stability and a global commodities boom, but began to slow in the second half of 2007 due to the electricity crisis and the subsequent global financial crisis' impact on commodity prices and demand. GDP fell nearly 2% in 2009 but then recovered from 2010, although at a slow pace. Unemployment remains high and outdated infrastructure has constrained growth. ZAR continued its rapid deterioration against the USD through 2013, fueled by the threat of withdrawal of global capital flows from local fixed income markets, in an environment of already weakening domestic economic growth. Further ZAR weakness will continue until global risk aversion reverses course and small continuing portfolio outflows from the country transform into a steady inflow.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** The standard CIT rate is 28%. Other CIT rates may apply depending on the business activity of the company
- **Capital gains:** Taxed at normal corporate rate on 66.6% of the net gain realized by a company of the gains
- **Withholding tax**
 - **On dividends:** With effect from 1 April 2012, dividends paid to individuals and foreign persons are subject to a 15% dividends WHT (subject to the provisions of any applicable treaty)
 - **On interest:** as from 1 January 2015, a 15% WHT will be charged on interest paid to non-resident. Exemption applies to interest on any listed debt, interest paid to any foreign person by the government of South Africa, any bank, the South African Reserve Bank, the Development Bank of Southern Africa or the Industrial Development Corporation or a headquarter company

REGULATION AND REPATRIATION

- The South African Reserve Bank (SARB) is the country's central bank with the primary purpose to achieve and maintain price stability in the interest of balanced and sustainable economic growth. Together with other institutions, it plays a pivotal role in ensuring financial stability.
- The SARB has intervened in the market to accumulate foreign exchange reserves, but this has rarely had much effect on the currency level
- In 1995, all exchange controls on non-residents were eliminated. However, only

- fully-registered dealers can conduct foreign exchange transactions
- Payments in hard currencies (EUR/USD) not allowed between residents
- All capital transactions must be notified to the Central Bank
- The Monetary Policy Committee consists of eight members, who meet for two days every two months
- The SARB regulates exchange rate policy and is responsible for implementing monetary policy
- Since 2003 the SARB has been following an inflation-targeting regime, with the target band is 3%-6% for CPI-X inflation. A biannual policy review is published in May and November
- Cash repatriation generally allowed but the offshore individual allowance is limited to ZAR 2 million per resident
- Local and international cash pooling allowed
- Local companies are restricted in the amount of offshore investments, although the SARB still has to approve outward investment plans and retains the right to stagger capital outflows relating to very large foreign investments. Local companies are also allowed to retain foreign dividends offshore and South Africans are free to invest in listed instruments of foreign companies on South Africa's bond and securities exchanges
- Exporters are required to repatriate foreign currency earnings within 180 days, and foreign asset exposure of local pension funds is restricted by prudential limits

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

TUNISIA – TND

(TUNISIAN DINAR) Deliverable **Yes** Convertible **Yes**

Managed floating currency

Tunisia initiated the Arab Spring movement in 2010, and the economy has since struggled especially on the tourism side. On the political side, a new constitution which is warmly welcomed and supported by the international community, might give hope for the coming years as more stability in the political system will surely help the economy to recover.

- The authorized exchange options are the European options
- The movements of funds between Tunisia and abroad should be notified to the Central Bank
- Residents have to repatriate and sell the currencies coming from the export of goods, the payment of abroad services and any incomes or products coming from abroad

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

ZAMBIA – ZMW

(KWACHA ZAMBIEN) Deliverable **Partial** Convertible **Yes**

Zambia has had a decade of rapid economic growth. A combination of prudent macroeconomic management, market liberalization policies, and steep increase in copper prices helped drive investments in the copper industry and related infrastructure to achieve an average annual growth of about 6.4% during the last decade. Though the economy is dependent on copper, the agriculture sector is the major employer (70% of the population). The recent rebasing of the national accounts has given a new perspective to the structure of the economy with more prominence for mining, construction and trade.

REGULATION AND TAX TREATMENT

GENERAL INFORMATION

- **Convertible:** YES but only against the Euro
- **Deliverable:** the CFA Franc (XAF) is deliverable only within the region of the Economic and Monetary Community of Central Africa and cannot be transferred outside of this region

TAXATION (SPECIFIC FOR EACH COUNTRY)

CAMEROON

- **Corporate income tax:** The standard corporate income tax will be decreased from 35% to 30%. A 10% additional local council surcharge may apply
- **Capital gains:** taxed as ordinary income at normal corporate rate
- **Withholding tax on dividends:** A 10% WHT applies on outbound payments of dividends by companies resident in Cameroon and listed at the Douala Stock Exchange. Under Finance Law 2014, the reimbursements of loans granted by foreign shareholders are recharacterized as dividends and are liable to the tax on income from movable capital at the rate of 16.5%, if the loans were initially at the disposal of the company through cash payments
- **Withholding tax on interest:** Exemption applies to interests on a foreign loan, the maturity of which is equal to or exceeds 7 years. Outbound payments of interest on corporate bonds issued by companies resident in Cameroon and listed in the Douala Stock Exchange are subject to reduced final withholding tax rates, as follows: 10% if the bond has a maturity period shorter than 5 years; and 5% if the maturity period of the bond exceeds 5 years

CENTRAL AFRICAN REPUBLIC

- **Corporate income tax:** 30%
- **Capital gains:** taxed as ordinary income at normal corporate rate
- **Withholding tax on dividends:** Exemption applies to dividends paid by Central African Republic resident corporate entities to foreign parent companies under certain conditions
- **Withholding tax on interest:** 15% on the gross amount

CHAD

- **Corporate income tax:** Under certain circumstances, capital gains are subject to a special tax regime
- **Capital gains:** taxed as ordinary income at normal corporate rate
- **Withholding tax on dividends:** 20% on the gross amount
- **Withholding tax on interest:** 25% on the gross amount

REPUBLIC OF CONGO

- **Corporate income tax:** With effect from 1 January 2014, the standard corporate income tax rate is decreased from 33% to 30% for taxable profit exceeding F.CFA 1,000
- **Capital gains:** taxed as ordinary income at normal corporate rate
- **Withholding tax on dividends:** 20% on the gross amount
- **Withholding tax on interest:** 20% on the gross amount. Exemption

applies on interest paid by holding companies to non-resident financial institutions or to shareholders and partners under certain conditions

EQUATORIAL GUINEA

- **Corporate income tax:** 35%. The first F.CFA 1.000 (XaF) of the taxable base is not subject to the 35% rate.
- **Capital gains:** taxed as ordinary income at normal corporate rate
- **Withholding tax on dividends:** 25% on the gross amount
- **Withholding tax on interest:** 10% on the gross amount

GABON

- **Corporate income tax:** 30%
- **Capital gains:** Capital gains on the transfer of assets between group member companies are liable to CIT at a final 20% rate
- **Withholding tax on dividends:** A 20% final WHT is levied on dividends distributed by resident companies, to non-resident companies, unless a lower treaty rate applies. A 10% WHT may apply under certain conditions
- **Withholding tax on interest:** A 20% WHT applies to income from debt claims, deposits and guarantees paid to legal entities which do not have their legal seat in Gabon income from interest, arrears of interest and any other fixed revenue from investment income other than income from claims, deposits and guarantees paid to companies who do not have a permanent establishment in Gabon. A 10% WHT is levied on interest paid to non-resident companies on certain bonds with a maturity period of less than 5 years (5% WHT may apply under certain conditions). Exemption applies to income from movable capital, including interest, derived in Gabon and paid to non-resident group member companies

REGULATION AND REPATRIATION

- The CFA Franc follows a fixed currency peg regime against the Euro
- The CFA Franc is not traded outside of the Economic and Monetary Community of Central Africa, but is fully convertible against the Euro (the convertibility is guaranteed by the French treasury)
- There are no formalities to be complied with before entering into any FX transactions by foreign investors except to open an account at local bank and according to the kind of transaction; the evidence of justification can be required
- Payments and transfers are allowed and must be made through licensed intermediaries
- Licensed intermediaries are entitled to open the account in the CFA franc or in the Euro in favour of non-residents, only if they justify their quality and effective residence accompanied with relevant documentation specifying all their activities in the region of the Economic and Monetary Community of Central Africa
- Repatriation of profits and the foreign direct investment over 100 million XAF require a prior authorization 30 days before it

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

THE WEST AFRICAN CFA FRANC

(XOF) Deliverable **Partial** Convertible **Partial**

(1 EUR = 655.957 XaF/Xof)

The West African CFA franc (XOF) is the common currency of eight states in West Africa: Benin, Burkina Faso, Ivory Coast, Guinea-Bissau, Mali, Niger, Senegal and Togo. The currency is issued by the Central Bank of the West African States for the members of the West African Economic and Monetary Union.

GENERAL INFORMATION

- **Convertible:** YES but only against the Euro
- **Deliverable:** the CFA Franc (XOF) is deliverable only within the region of the West African Economic and Monetary Union and cannot be transferred outside of this region

TAXATION (SPECIFIC FOR EACH COUNTRY)

BENIN

- **Corporate income tax:** 30%
- **Capital gains:** taxed as ordinary income and included in the taxable base to the corporate income tax
- **Withholding tax on dividends:** This rate may be reduced to, inter alia, 10% for the dividends distributed by joint-stock companies and 7% for dividends distributed by joint-stock companies listed on a stock exchange under certain conditions
- **Withholding tax on interest:** A 6% WHT applies on interest derived by non-resident legal persons from investment in bonds issued in Benin. This rate may be reduced to 3% for interests on Benin government bonds

BURKINA-FASO

- **Corporate income tax:** 27.5%
- **Capital gains:** taxed as ordinary income at normal corporate rate (except gains from disposal of real estate taxed at the rate of 10%)
- **Withholding tax on dividends:** 12.5% on the gross amount
- **Withholding tax on interest:** 6% on the gross amount. Interest from debt claims, deposits and guarantees is subject to the tax on income from debt claims at a standard rate of 25%. A 12.5% rate is applicable to income from deposit accounts and current accounts with a bank or a financial broker

IVORY COAST

- **Corporate income tax:** 25%
- **Capital gains:** Exemption applies on capital gains from securities issued by WAEMU (West African Economic and Monetary Union) member countries and capital gains resulting from investment transactions carried out by mutual funds and investment funds

- As of 1 February 2015, cross-border transactions between Ivory Coast resident taxpayers and persons resident in member countries of the OCAM (Organization Commune Africaine et Malgache) and the CEAO (Communauté économique de l'Afrique de l'Ouest) which have both been dissolved, are subject to the Ivory Coast domestic tax provisions and also to the effective tax treaties signed by Ivory Coast with these countries
- **Withholding tax on dividends:** Dividends derived by non-resident companies are subject to a final WHT at the following rates: 10% on dividends paid by listed companies, 15% on dividends distributed by companies the profits of which are exempt from corporate income tax, and 15% on others distributions
- **Withholding tax on interest:** Interest derived by non-resident companies is subject to a final WHT as follows: 1%, 5%, 10% and 16.5% for interest on bank deposits; 16.5% on interest paid on current banks accounts; and 15% on other interest. Interest on treasury bonds is subject to the following rates: 10% when the maturity of the bond is fixed at 3, 6 or 12 months; 5% when the maturity of the bond is between 3 and 5 years. A reduced 2% rate applicable on bonds and ancillary income from debt securities issued in Ivory Coast, the maturity of which is equal or over 5 years. Other rate may apply under certain conditions

GUINEA-BISSAU

- **Corporate income tax:** 25%
- **Capital gains:** taxed as ordinary income at normal corporate rate
- **Withholding tax on dividends:** 10% on the gross amount
- **Withholding tax on interest:** 10% on the gross amount

MALI

- **Corporate income tax:** 30%
- **Capital gains:** taxed as ordinary income at normal corporate rate. However, several categories of capital gains are exempt from corporate income tax.
- **Withholding tax on dividends:** A 7% WHT apply to dividends distributed by a Mali resident company listed on a stock exchange approved by the CREPMF (Conseil Régional de l'Epargne Publique et des Marchés Financiers)

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

REGULATION AND TAX TREATMENT

- **Withholding tax on interest:** the standard withholding tax rate on interest is 18%. Specific rates are applicable to other types of interest as follows: 3% for interest on government bonds with a maturity period from 5 to 10 years; government bonds with a maturity period of more than 10 years are exempt; 6% for interest on corporate bonds, this rate is increased to 13% if the corporate bonds are traded in the financial market; 9% for interest on bank deposits; 15% for interest on debts and bonds

NIGER

- **Corporate income tax:** 30%
- **Capital gains:** Capital gains are imposed at the rate of 7% on gains from shares and equities, 5% on gains from bonds, 5% on gains from the transfer for consideration of real estate or from the expropriation of real estate
- **Withholding tax on dividends:** A reduced rate of 7% applies on dividends from companies quoted within the WAEMU (West African Economic and Monetary Union) area by the CREPMF (Conseil Régional de l'Épargne Publique et des Marchés Financiers) Exemption applies on dividends distributed by open-ended investment companies (société d'investissement à capital variable, SICAV) and close-ended investment companies (société d'investissement à capital fixe, SICAF)
- **Withholding tax on interest:** Exemption applies to interest on bonds derived by non-resident companies which are resident out of the WAEMU area

SENEGAL

- **Corporate income tax:** As of 1 January 2013, the standard CIT rate was increased from 25% to 30% the 30% rate applies on profits derived in 2012 and assessed in 2013
- **Capital gains:** taxed as ordinary income at normal corporate rate.
- **Withholding tax on dividends:** 10% on the gross amount.
- **Withholding tax on interest:** A 8% WHT applies on interest on deposit bank accounts held in Senegal paid to non-resident companies, unless a lower treaty rate applies. A 20% WHT applies on interest on time deposit certificates (bons de caisse). A 6% WHT applies on interest on government bonds with a maturity period equal to or exceeding 5 years is subject to a final withholding tax at the rate of 6%.
- Other types of interest payments from Senegal to non-resident companies are subject to a final withholding tax at the rate of 16% on their gross amount

TOGO

- **Corporate income tax:** 29%
- **Capital gains:** several categories of capital gains are exempt from CIT. Special tax rates on gains arising from the disposal of shares and bonds: the tax rate is 5% on the sale of share, but is 3% on gains derived from the transfer of bonds
- **Withholding tax on dividends:** a 7% WHT rate applies on dividends distributed by companies on a stock exchange approved by the CREPMF (Conseil Régional de l'Épargne Publique et des Marchés Financiers) inside the WAEMU (West African Economic and Monetary Union)
- **Withholding tax on interest:** la phrase et remplacer par : "A 6% WHT applies on interest derived by non-resident companies, unless a lower treaty rate applies

ZAMBIA

- **Corporate income tax:** The standard corporate income tax rate is 35%. Different rates may apply depending on the activity of the company
- **Capital gains:** No taxation
- **Withholding tax on dividends:** A 15% WHT applies on dividends paid to non-resident companies. Some exemptions may apply depending on the activity of the company
- **Withholding tax on interest:** A 15% WHT applies on interest paid to non-resident companies. Exemption applies for a period of 5 years if the interest payments are being made by a person developing a multi-facility economic zone or an industrial park under the Zambia Development Act

REGULATION AND REPATRIATION

- The CFA Franc follows a fixed currency peg regime against the Euro
- The CFA Franc is not traded outside of the West African Economic and Monetary Union, but is fully convertible against the Euro (the convertibility is guaranteed by the French treasury)
- Foreign exchange controls do not apply to foreign investors, however, they have to open an account at local bank for FX trading
- Payments and transfers are allowed and must be made through licensed intermediaries
- Licensed intermediaries are entitled to open the account in the CFA franc or in the Euro in favour of non-residents, only if they justify their quality and their effective residence. The account opening in other currency than Euro requires a prior authorisation of the Central Bank of the West African States
- There are no restrictions on foreign investment or profit repatriation

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

EMERGING STRATEGY OUTLOOK

ASIA

Riding the
Volatility Wave

Societe Generale Emerging Strategy

Key features of Asian currencies in the first half of the year will be higher volatility, wider trading ranges, and aggressive oscillations between short-lived rallies and temporary corrections. Asian central banks are either in easing mode or have a neutral stance due to local growth being at, or slightly below, trend coupled with near-term disinflationary pressures from domestic or external factors. Asian rates should largely go higher alongside USD rates, a trend that may become more obvious in H2. But there is no lack of exceptions in this upward move given the expected divergence in monetary policies between the Fed and Asian central banks.

In China, Chances of a large depreciation (>5%) are small and would only materialise if a dramatic growth slowdown (sub-5% in 2015) occurred. On interest rates, the PBoC will use liquidity tools to ease monetary conditions, relying less on FX intervention for domestic money creation. We look for a bullish-steepening in the repo-IRS curve, with front-end rates likely softening upon liquidity support while mid-to long-end rates are capped by the economic outlook.

In South Korea, we expect the KRW to gradually strengthen through 2015, due to a strong external position, the BoK nearing the end of its easing cycle, and neutral valuation. But in the first half of the year there is apt to be significant volatility around the trend from fluctuating EM sentiment due to US monetary policy or global growth concerns. Interest rates have been steadily grinding lower since early 2014 and further near term declines cannot be ruled out but an upward bias should emerge over the course of the year with Fed hiking rates and resilient Korean fundamentals. The persistent flattening of the yield curve since early 2014 should start to reverse on a stable-to-higher yield environment.

In India, a manageable current account deficit, acceleration in growth coupled with a lower inflation profile, ongoing foreign portfolio inflows, and attractive risk adjusted carry should be INR supportive. A more durable and less volatile appreciation path should ensue. Indian yields should remain biased to the downside given twin deficits are on the mend, lower oil and inflation, coupled with further easing by the RBI.

In Malaysia, depreciation pressures on the MYR have been intense, but we expect a gradual appreciation around a volatile trend throughout the year. Unless signs of stress appear in the local bond market, offshore IRS, CDS, or banking system, risk-reward favours a constructive stance. Policy rates are near a historical peak and absent a significant uptick in growth or inflation. Inflation risks are balanced with upward pressure from the introduction of GST and strong domestic consumption being offset by downward price pressures from lower oil, a lower subsidised fuel prices. Going into H2, MYR rates should nevertheless be affected by USD rates movement via asset re-allocations.

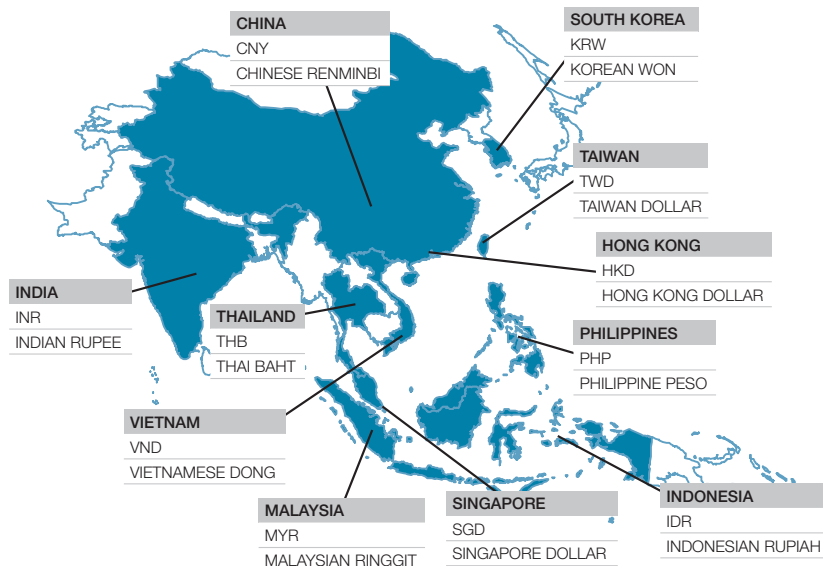

In Singapore, the SGD should come under pressure as expectations off MAS easing intensify. The low growth and inflation backdrop argues for reduced appreciation bias on the S\$NEER. SGD rates should move higher alongside US yields. Front-end SGD rates will face additional paying interest on MAS expectations.

In Indonesia, The outlook for the IDR is decidedly negative due to political, structural, cyclical and capital outflow risks. We expect yields to drift higher due to risks of currency depreciation, US monetary policy and high foreign ownership of local debt. That said, the upward move in rates will be partly mitigated by lower inflation in Indonesia.

CHINA – CNY

(CHINESE RENMINBI (YUAN UNIT)-RMB) Deliverable **No** Convertible **Partial**

After keeping its currency tightly linked to the USD for years, in 2005 China revalued its currency by 2.1% vs USD and moved to an exchange rate system that references a basket of currencies. From mid 2005 cumulative appreciation of the Renminbi vs USD was more than 20%, but late 2008 the exchange rate remained virtually pegged to the dollar from the onset of the global financial crisis until June 2010. In 2009, the global economic downturn reduced foreign demand for Chinese exports but China rebounded quickly, outperforming all other major economies in 2010 with GDP growth around 10%. The economy slowed down in 2011, on the back of monetary policy tightening aimed at fighting inflation. The Chinese authorities will allow rapid CNY appreciation to fight inflation. The other issue for China is local government debt, which swelled as a result of stimulus policies, and is largely off-the-books and potentially low-quality. China's growth has continued to decelerate over the past few years. The CNY has appreciated by 10% since mid of 2010 when authorities allowed resumption of gradual appreciation. However, the PBoC reportedly bought big amounts of dollars in 2014 to introduce more volatility into the market and reduce one sided long CNY bets. This is part of the reforms the authorities are pursuing.

CHINA – CNY

CONTINUED

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 25%. However, special rates apply to small-scale enterprises (20%)
- **Capital gains:** Taxed as ordinary income at normal corporate rate
- **Withholding tax**
 - **On dividends:** Dividends distributed from profits generated prior to 2008
 - **On interest:** Exemption applies on interest income from bonds issued by departments under the State Council in charge of treasuries (i.e. the Ministry of Finance) and on certain types of interest on a loan made by a foreign government to the PRC government and on interest on loans with preferential terms made by international financial organizations to the PRC government and residential enterprises

REGULATION AND REPATRIATION

- In March 2003, the China Banking Regulatory Commission (CBRC) was established to assume the financial supervisory role once undertaken by PBOC
- 2005: Move from USD peg to a managed float. CNY moves monitored with a reference basket with weights based upon the composition of China's trade, inward direct investment and foreign debt

- The SAFE regulates exchange controls, while the People's Bank of China (PBOC) is responsible for implementing monetary policy and ensuring overall stability in the financial sector
- Certain kinds of conversion under non-trade and capital items require pre-approval from the State Administration of Foreign Exchange (SAFE)
- All transactions involving foreign exchange are strictly controlled by the SAFE
- Exchange controls have been reduced at a gradual pace to allow market forces to play a bigger role
- Only licensed onshore counterparties are allowed. CNY spot can currently only be traded against USD, HKD, EUR and JPY on CFETS (China Foreign Exchange Trade System), conditional on submission of the required documentation
- Registered FIEs—non-residents with permission to conduct business in China—can deposit money in either foreign currency-denominated or local currency denominated accounts
- Dividends paid or profits distributed by a FIE to foreign investors are exempt from withholding tax
- Only after tax profit are allowed to repatriate

NAVIGATING THE CHINESE MARKETS

AN INTEREST RATES & FOREIGN EXCHANGE GUIDE
FOR CORPORATES OPERATING IN CHINA

EXECUTIVE SUMMARY

- A practical guide for SG clients on Foreign Exchange and Interest Rate markets in China.
- Document prepared by Interest Rates and Foreign Exchange Derivatives group in SG's Global Markets Divisions, with the assistance of SG's Global Markets Division personnel covering China. The Market Risk Advisory team is part of the Interest Rates and Foreign Exchange derivatives sales department, and focuses on advising corporate clients on strategic risk management.
- For an increasing number of international companies, China has become a critical growth engine.
- Société Générale has been present in China since 1981, accompanying and supporting corporations wishing to develop in the mainland for over three decades. Today, Société Générale's staff in China exceeds 600 and the group enjoys one of the broadest networks among western-based banks, with a presence in the country's principal commercial centers (Beijing, Shanghai, Tianjin, Guangzhou, Hangzhou and Wuhan).
- Société Générale benefits from a strong offshore anchorage in Hong Kong, where it has been a major player for over 30 years, mainly through its Corporate and Investment banking and Private banking divisions. The group now employs nearly 1,000 people and offers an innovative range of solutions and financial products to corporations and investors.

THE GUIDE PROVIDES COMPREHENSIVE INFORMATION ABOUT

- Chinese FX market: one currency (RMB), two spot rates (CNY & CNH)
- Regulatory considerations for the Chinese market
- Several regulations, several market structures & interactions
- Liberalization in China: history and expectations

HONG KONG – HKD

(HONG KONG DOLLAR) Deliverable **Yes** Convertible **Yes**

Hong Kong's GDP fell in 2009 as a result of the global financial crisis, but the economy grew nearly 6.8% in 2010. The Hong Kong government adopted several temporary fiscal policy support measures in response to the crisis that it may discontinue if strong growth is sustained. Hong Kong continues to link its currency closely to the US dollar, maintaining it between 7.75 and 7.85 by an arrangement established by the Hong Kong Monetary Authority in 1983. Hong Kong continues to enjoy its status of major financial center in Asia. Meanwhile, economic growth has been on the low side by Asian standards

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 16.5%. There is a reduction of 75% of the final tax for the year of assessment 2013/2014. Subject to a maximum of HKD 20,000 per case, a one-off reduction of 75% of the current profits tax for the year of assessment 2014-15 is proposed
- **Capital gains:** Profits tax may be charged on the profits of a speculative transaction if it can be shown to be an adventure in the nature of trade
- **Withholding tax**
 - **On dividends:** No taxation
 - **On interest:** No taxation

REGULATION AND REPATRIATION

- The Hong Kong Monetary Authority uses a currency board to manage the HKD
- It is at the Financial Secretary's discretion to re-peg or float the currency

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

INDIA – INR

(INDIAN RUPEE) Deliverable **No** Convertible **Partial**

In 2010, the Indian economy rebounded robustly from the global financial crisis - in large part because of strong domestic demand - and growth exceeded 8% year-on-year in real terms. Inflation peaked at about 11% in the first half of 2010, but has gradually decreased to single digits following a series of central bank interest rate hikes. The Indian rupee underperformed in 2014 reflecting concerns about worsening economic situation. Since then, Indian authorities have tried to address macro imbalances, which has helped boost risk sentiment. The new set of GDP figures: 6.9% for 2014 and forecasted at 7.4% for 2015 make India the fastest growing G-20 economy. While reforms have been slow in coming, the newly elected Indian government has improved India's business climate and worked at restarting of India's capex cycle.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 30%. A 5% or 10% surcharge is applicable to resident companies on the tax liability under certain conditions
- **Capital gains:** 30% for Short-term gains plus surcharge (if applicable) and cess, resulting in an effective rate of 32.445% (if 5% surcharge) and 33.99% (if 10% surcharge). 20% for Long-term gains plus surcharge and cess, resulting in an effective rate of 21.63% (if 5%) and 22.66% (if 10%). Long-term capital gains on specified securities are exempt, while short-term gains are taxed at concessionary rates
- **Withholding tax**
 - **On dividends:** Dividends are exempt if the payer has paid dividend distribution tax (DDT: Tax on distributed profits). DDT is payable by domestic companies on the amount declared, distributed or paid by way of dividends out of their current or accumulated profits. Dividends declared by a holding company from dividends received from its subsidiary which has paid DDT thereon is not subject to DDT to that extent. The rate of tax is 15%, plus surcharge and education cess, resulting in an effective rate of 16.995%
 - **On interest:** A 5% WHT applies to interest in respect of borrowings

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

under a loan agreement, under certain conditions. This rate will be increased by applicable surcharge of 0% or 2% or 5% for corporates and 0% or 10% for non-corporates. Further, a cess at 3% will be levied on tax plus surcharge. Different rates apply regarding corporate and Government bonds

REGULATION AND REPATRIATION

- The Reserve Bank of India (RBI) regulates exchange controls, financial transactions and the banking system
- Current account: No prior approval requirements but participants must have documentary evidence of the underlying transaction for remittances
- Capital account: All FX transactions are subject to general or specific permission from the RBI. Capital repatriation is allowed with prior approval
- Onshore FX contracts including forwards and derivatives, to the extent permitted, can be entered into only by resident entities. The exception is Foreign Institutional Investors (FIIs), which are given limited access to forward contracts. Anything not specifically allowed is deemed to be disallowed

INDONESIA – IDR

(INDONESIAN RUPIAH) Deliverable **No** Convertible **Partial**

The economy recorded a more than 6% growth in 2007 and 2008, afterwards it slowed to 4.5% in 2009, however by 2010 it returned to 6% growth rate. From late 2010, increasing inflation, driven by higher and volatile food prices, posed an increasing challenge to economic policy makers and threatened to push millions of the nearpoor below the poverty line. Indonesia's GDP growth has been quite robust since 2010, but Indonesia's macro challenges have been revolving around the widening current account deficit and large fiscal imbalances.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** The tax rate for listed entities can be reduced by 5% where at least 40% of the issued and paid-up share capital is held by 300 or more public shareholders, each of whom less than 5%, for a period of more than 183 days
- **Capital gains:** There is no separate tax on capital gains, which are included in ordinary taxable income and calculated under normal income taxation rules. However, capital gains from the disposal of shares listed on the stock exchange are subject to tax at 0,1% on the gross value on the transaction
- **Withholding tax**
 - **On dividends:** A WHT of 20% is levied on dividends paid to non-residents
 - **On interest:** A WHT of 20% is levied on interest paid to non-residents unless a lower treaty rate applies

REGULATION AND REPATRIATION

- Bank Indonesia (BI), the Central Bank, is the primary regulator of the financial sector, it implements monetary policy for the government, intervention in case of excessive volatilities
- Foreign investors have access to Indonesia's fixed income and spot FX markets; however, non-residents are subject to certain restrictions in the onshore FX forwards market
- IDR is not allowed to be transferred out of Indonesia.
- FX operations must be reported when happening between onshore and offshore entities
- Holding foreign currency in local accounts is allowed
- There are no restrictions on repatriation

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

MALAYSIA – MYR

(MALAYSIAN RINGGIT) Deliverable **No** Convertible **Partial**

The central bank maintains healthy foreign exchange reserves and its well-developed regulatory regime has limited Malaysia's exposure to riskier financial instruments and the global financial crisis. Nevertheless, decreasing worldwide demand for consumer goods hurt Malaysia's exports and economic growth in 2009, although the economy recovered in 2010. Malaysia's macro position is solid, combining low inflation and robust growth. The main policy challenges have been the weak fiscal position reflecting the high subsidies and the narrowing current account surplus.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 25%
- **Capital gains:** Capital gains (other than gains from the disposal of real property) are not treated as income and not subject to income tax. Income arising from isolated transactions or recurring capital transactions which are in the nature of trade may be deemed to be business income and taxed as such
- **Withholding tax**
 - **On dividends:** No taxation
 - **On interest:** Exemption applies to, inter alia, interest paid or credited by any person carrying on the business of banking or finance in Malaysia interest paid or credited to any company not resident in Malaysia, under certain conditions. Other exemption may apply

REGULATION AND REPATRIATION

- Bank Negara Malaysia (BNM), the Central Bank, is the primary regulator of the financial sector, it sets and manages monetary policy
- All FX transactions must take place with Authorized Dealers as defined under the Exchange Control Act of Malaysia
- Securities denominated in MYR are not permitted to be traded outside Malaysia
- All MYR securities are to be deposited with and transacted through authorized local depositories

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

PHILIPPINES – PHP

(PHILIPPINE PESO) Deliverable **No** Convertible **Partial**

Managed floating exchange rate regime since 1992. Philippine GDP grew 7.3% in 2010, spurred by consumer demand, a rebound in exports and investments. The economy weathered the 2008-09 global recession better than its regional peers due to minimal exposure to troubled international securities, lower dependence on exports, relatively resilient domestic consumption, large remittances from five-million overseas Filipino workers, and a growing business process outsourcing industry. Philippines economy is fundamentally very strong, reflecting strong growth, controlled inflation, low domestic debt and a robust current account position. On the FX policy side, the central bank tends to neutralize inflows by intervening in the FX market.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** As from 1 January 2009, corporations are taxed at a rate of 30%
- **Capital gains:** Capital gains from the sale of certain shares and real property are subject to tax at specific rates
- **Withholding tax**
 - **On dividends:** A WHT of 30% is levied on dividends paid to a non-resident company. However, under certain conditions they are taxed at a rate of 15%
 - **On interest:** A 20% WHT applies on interest on foreign loans, i.e. those payable in foreign currency. Interest on foreign currency loans from local banks is subject to a rate of 10% if paid to residents and 0% if paid to non residents

REGULATION AND REPATRIATION

- Bangko Sentral ng Pilipinas (BSP), the Central Bank, has supervisory authority over all banking activities, including FX and interest rate trading. It also sets the monetary policy (inflation targeting)
- Foreign investors can have PHP or US dollar deposits in local banks on the condition that their nonresident PHP accounts are funded by inward remittances of foreign currency
- Overdrafts are prohibited in all cases
- Holding foreign currency onshore is allowed
- Non-residents are allowed to buy PHP against foreign currency onshore.
- The purchase of foreign exchange for outward investments is allowed up to a maximum of USD 6m without prior BSP approval. A letter of undertaking stating that all proceeds will be sold back to the banking system is also necessary

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

SINGAPORE – SGD

(SINGAPORE DOLLAR) Deliverable **Yes** Convertible **Yes**

Real GDP growth averaged 7.1% between 2004 and 2007. The economy contracted 1.3% in 2009 as a result of the global financial crisis, but rebounded nearly 14.7% in 2010, on the strength of renewed exports. Over the longer term, the government hopes to establish a new growth path that focuses on raising productivity, which has sunk to 1% growth per year in the last decade. Singapore has attracted major investments in pharmaceuticals and medical technology production.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 17%. However, tax exemptions and reductions are available
- **Capital gains:** Capital gains are generally not taxable. In certain cases where there is a series of transactions or where the holding period of the asset is short, capital transactions may be deemed to constitute a trade that generates income. The taxpayer's intention upon entering the transaction may determine whether it will produce taxable income which is consequently taxable as business income. Exemption applies on gains derived by a divesting company from a disposal of ordinary shares in an investee company, under certain conditions

Withholding tax

- **On dividends:** No taxation
- **On interest:** Exemption applies on interest paid to a non-resident in relation to Singapore government securities that qualify as "qualifying debt securities", under certain conditions

REGULATION AND REPATRIATION

- Controls are in place to maintain exchange rate stability: The Monetary Authority of Singapore has to approve the offshore utilisation of locally obtained funds (>5m SGD)
- Outright FX Forwards are not subject to restrictions
- No limitations on the repatriation of income, capital gains and capital

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

SOUTH KOREA – KRW

(KOREAN WON) Deliverable **No** Convertible **Yes**

Growth moderated to about 4-5% annually between 2003 and 2007. With the global economic downturn in late 2008, South Korean GDP growth slowed to 0.2% in 2009. In the third quarter of 2009, the economy began to recover, in large part due to export growth, low interest rates, and an expansionary fiscal policy, and growth exceeded 6% in 2010. South Korea's growth continues to be strong but the absence of a credit boom is likely to limit domestic demand recovery. The KRW is behaving like a developed market currency now as per capita income has risen.

TAIWAN – TWD

(TAIWAN DOLLAR) Deliverable **No** Convertible **Partial**

Free floating since 1989. The heavy dependence on exports exposes the economy to world demand. In 2010 GDP grew 10.5%, as exports returned to the level of previous years. The island runs a large trade surplus, and its foreign reserves are the world's fourth largest. Taiwan is a highly open economy, and highly dependent on world trade flows. Taiwan runs a large trade surplus, and its central bank has accumulated huge foreign reserves, which has helped give the TWD a status of low-beta currency in Asia.

VIETNAM – VND

(VIETNAMESE DONG) Deliverable **No** Convertible **No**

The global recession has hurt Vietnam's export-oriented economy, with GDP in 2009-10 growing less than the 7% per annum average achieved during the last decade. The dong, continues to face downward pressure due to a persistent trade imbalance, and, since 2008, the government devalued it by 20% through a series of small devaluations. The government's strong growth-oriented economic policies have caused it to struggle to control one of the region's highest inflation rates, which reached 11.8% in 2010. Vietnam's economy also faces challenges from falling foreign exchange reserves, an undercapitalized banking sector, and high borrowing costs. The VND has been devalued by the central bank in regular intervals and is down by 20% since start of 2009. The central bank has kept trading band of $\pm 1\%$ the official fixing since February 2011.

EMERGING STRATEGY OUTLOOK

LATIN AMERICA

Learning to dance
to a new beat

Societe Generale Emerging Strategy

Latin American currencies endured another year of weakness in 2014. Most of the depreciation pressure was felt in the second half of the year, when a combination of collapsing commodity prices, global growth concerns, and Fed uncertainties engineered a slide even larger than the tapering-driven sell-off of mid-2013. Unsurprisingly, the Colombian peso (COP) was the region's worst performer, with the oil sector accounting for roughly half of exports and one-third of foreign direct investments. Yet the COP was hardly alone in feeling the pressure of worsening terms of trade and weakened risks sentiment.

In Brazil, the real (BRL) continues on its roller coaster ride, driven by both external and domestic worries. Demand for the high-yielding EM currency (at the time of writing NDF implied yields are around 12%) has weakened in recent months as financial market volatility has risen, despite lower yields in developed markets. Domestically, the BRL enjoyed a relief rally on the back of President Dilma Rousseff's market-friendly signals following her October 2014 re-election. Despite a credible turn towards greater economic policy orthodoxy led by new Finance Minister Joaquim Levy, concerns around growth, public debt, and external accounts are likely to persist. External conditions for carry can exert a great deal of influence on the BRL in the short-term, but fundamentals point to further weakness over longer time horizons.

Conversely, we remain confidently bullish on the **Mexican peso (MXN)**, despite the currency's messy recent price action. Lower oil prices are negative for the peso, but we find this theme of lesser consequence than some Latam investors may believe. The real driver of the MXN's recent weakness has been widening risk premium and the currency's attractiveness as a hedging tool, in our view. As markets normalize in the coming months – most likely after the Fed puts its first rate hike behind it – fundamentals could carry USDMXN much lower. The beginning of energy sector-related FDI should help, but an even bigger source of enthusiasm is the US recovery, which already appears to be exerting a positive effect on Mexico's trade balance and its manufacturing sector.

The Chilean peso (CLP) has been a relative outperformer to start the year, but we think risks are skewed in a negative direction over the remainder of 2015. Copper prices have experienced another significant leg lower since the BCCh ended its easing cycle in October, and along with sluggish confidence levels and fairly soft inflation expectations, we see a potential path for further rate cuts. Meanwhile, monthly data suggests Chile's influential pension funds continue their secular trend of incrementally greater investment in foreign currency assets.

Somewhat against consensus, we see more value in the beleaguered **Colombian peso (COP)**. The currency was hit hard in the second half of 2014 in reaction to the collapse in oil prices, raising concerns not only over the impact on external and fiscal accounts but for the possibility for rate cuts this year. On the last subject, at least, we remain somewhat skeptical. Economic activity by numerous measures remains the healthiest in the region, the fiscal impulse remains supportive, and BanRep has yet to show any signs of a dovish turn in its policy orientation. Amid stretched levels and (we sense) heavily bearish positioning, we see the COP as a potential surprise candidate to outperform this year.

Lastly, the **Peruvian sol (PEN)** is strongly likely to continue on its slow-but-steady depreciation path in the months ahead, at a rate that likely outpaces the currency's implied yield of roughly 5-6%. The BCRP has wisely controlled the pace of the sol's slide, mostly through a combination of spot selling of USDPEN and issuance of dollar-indexed certificates, but in our view these efforts are aimed more at protecting those still borrowed in foreign currency in a gradually de-dollarizing economy rather than fighting the trend altogether. To this point the PEN's adjustment in the face of shifting global realities has been more modest than in the case of its commodity-producing peers, and we see ample room for the currency to play catch up and weaken further by year-end.

3RD PARTY FX IN BRAZIL – ONSHORE

Brazil presents easy conditions to access local markets and assets.

Brazil Central Bank allows foreign investors to close deliverable FX with any local Financial Institution in a simplified manner in order to allow them to have access to competitive prices.

Why trade FX with SG Brazil?

Our capabilities: fast execution, transparency, advisory.

Our objectives: increase efficiency, minimize operational and settlement risks, build solid relationships over time.

Local expertise:

- Strong presence in FX onshore market
- Extensive know-how in a highly regulated environment
- Dedicated back office team prepared to process any FX transaction in full compliance with local regulation

BRAZILIAN GOVERNMENT BONDS – ONSHORE

SG Brazil offers to Foreign Clients the possibility to trade Brazilian Government Bonds and close FX operations with very competitive prices on a very simple way.

The Brazilian Government bonds can be traded through any authorised local Financial Institution:

- Fixed bonds (Zero Coupon Bonds, Coupon Bonds)
- Floating Bonds
- Inflation Bonds

Brazilian Government Bonds Market Overview

Total Brazilian Government Bonds (BRL settled) outstanding amount is USD 1 trillion (39% of GDP).

11.3% of it has been held by Foreign Investors, volume that has been increasing considerably and is mostly concentrated in long term bonds.

Composition:

Fixed Bonds 37%; Floating Bonds 32%; Inflation Bonds 27%; FX Bonds 5%.

BRAZIL – BRL

(BRAZILIAN REAL) Deliverable **No** Convertible **Partial**

In 2005, the foreign exchange market passed to be governed by the Exchange and Foreign Capitals Market Regulation (RMCC). After record growth in 2007/2008 the onset of the global financial crisis hit Brazil. However Brazil was one of the first emerging markets to begin a recovery. GDP growth returned to positive in 2010 boosted by an export recovery. Brazil's strong growth and high interest rates make it an attractive destination for foreign investors. Government is committing to inflation targeting by the Central Bank, a floating exchange rate and fiscal restraint. In June 2013 the Brazilian government eliminated some long-standing mechanisms previously used to constrain the BRL's appreciation – most notably the IOF tax on foreigners' purchases of local fixed income, as well as taxes and reserve requirements on short USDBRL positions on the BM&F. The BCB currently intervenes in the FX market specifically selling \$200m in FX swaps daily.

ARGENTINA – ARS

(ARGENTINE PESO) Deliverable **No** Convertible **Partial**

The end of the peso's decade-long 1-to-1 peg to the US dollar was announced in early 2002. In late 2007 economic growth slowed down sharply as government held back exports and world economy fell into recession. The economy has rebounded from the 2009 recession but the governments continued reliance on expansionary fiscal and monetary policies risks exacerbating high inflation. The authorities favour an undervaluation of the ARS in order to boost exports. In recent years Argentine Central Bank has managed a gradual nominal depreciation in the ARS in order to mitigate the impact of inflation and to avoid a real appreciation of the peso. This pattern accelerated in 2013 to just above 30% annualized. Subsequently, the exchange rate slide roughly 13% on Jan 23, 2014, after which it has remained roughly steady.

POLICY RATE

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** 35%
- **Capital gains:** Taxed as ordinary income at normal corporate rate
- **Withholding tax**
 - **On dividends:** A 10% WHT applies on dividends paid by resident companies to non-residents and remittances from permanent establishments. A 35% "equalization tax" applies to dividends, profit distributions or remittances paid to either residents or non-residents when commercial profits (i.e. profits as determined in the financial statements) payable in cash or in kind (except eligible stock) exceed taxable profits
 - **On interest:** Interest payments to non-residents are subject to final WHT either at the reduced 15.05% rate (under certain conditions) or at the general 35% rate. For instance, the 15.05% applies if: the borrower is an Argentine financial institution; or if the interest is for financing the importation of capital assets (except for cars); or where the lender is a financial institution/bank, under certain conditions

REGULATION AND REPATRIATION

- Prior consent of the Argentine Central Bank is required to access the foreign exchange market.
- Funds remitted into Argentina through the foreign exchange market are subject to mandatory deposit requirements and restrictions on re-transfer out of Argentina.

- Unless transactions are performed and settled in non Argentine currency outside of Argentina on international exchanges or with designated foreign banks or financial institutions and which are either:
 - performed by financial institutions relating to options to hedge variable-rate time deposits as approved by the Argentine Central Bank,
 - foreign currency agreements of financial institutions for hedging own lending positions,
 - foreign currency and interest rate agreements on account of external liabilities validated and reported under the Foreign Indebtedness Regime,
 - commodity price agreements between importers and exporters for hedging Argentine foreign trade operations,
 - Repurchase Transactions for external financing operations,
 - foreign currency agreements to hedge exporters against risks from outstanding shipments,
 - contracts involving price hedging of commodities by financial institutions provided certain conditions are fulfilled or
 - foreign currency agreements to hedge any amount to be paid under outstanding shipments in connection with Argentine imports of goods by which the hedger has paid a down payment to the foreign supplier or when the purchase has been structured with a letter of credit.

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

CHILE – CLP

(CHILEAN PESO) Deliverable **No** Convertible **Partial**

The Chilean Peso has been a free-floating currency since 1999. The Chilean government conducts a rule-based countercyclical fiscal policy, accumulating surpluses in sovereign wealth funds during periods of high copper prices and economic growth, and allowing deficit spending only during periods of low copper prices and growth. In May 2010 Chile signed the OECD Convention, becoming the first South American country to join the OECD. GDP grew more than 5% in 2010. All exchange controls were abolished by the BCCh in 2001. The BCCh bought \$50m per day in USDCLP in the spot market from January through Dec 2011, as a means of resisting exchange rate appreciation and building FX reserves.

REGULATION AND TAX TREATMENT

TAXATION

- Corporate income tax:** From 1 January 2014, the rate of the business income tax is 21%. The law provides for an increase of the income tax rate over a 4-year term. Accordingly, income derived or accrued in the following years will be subject to business income tax at the following tax rates: 2014: 21%; 2015: 22.5%; 2016: 24%; and 2017 onwards: 25%
- Capital gains:** Capital gains may also be subject to special taxation or not considered to be taxable income
- Withholding tax**
 - On dividends:** A WHT of 35% is levied on dividends derived by non-resident
 - On interest:** A 35% WHT is levied on interest derived by non-residents. Exemption applies on interest paid to foreign or international banks or to foreign or international financing institutions by a financial institution incorporated in Chile, under certain conditions. A 4% WHT may apply on interest paid on current accounts and term deposits

placed with an authorized institution; interest on loans granted by authorized foreign or international banks or financial institutions; interest to finance imports; interest on Chilean or foreign-currency bonds issued by Chilean companies; interest on Chilean or foreign-currency bonds issued by the state and the central bank; and interest on Latin American Banking Acceptances

REGULATION AND REPATRIATION

- The Central Bank (BCCh) retains the option of intervention in the FX market in all but exceptional situations
- Remittance of foreign currency out of or into Chile must be performed through the formal exchange market and entities domiciled or resident in Chile must comply with Central Bank reporting requirements.
- Settlements of derivatives with non-residents or remittance of interest or capital of external loans must be made through an authorized institution. Other transactions can be made without restrictions.
- Residents can borrow internationally without restrictions

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

COLOMBIA – COP

(COLOMBIAN PESO) Deliverable **No** Convertible **Yes**

Free-floating since 1999. Colombia is third largest exporter of oil to the United States. Because of the global financial crisis and weakening demand for Colombia's exports, Colombia's economy grew only 2.7% in 2008, and 0.8% in 2009 but rebounded to around 4.4% in 2010. BanRep has been active in FX markets in recent years, via various programs of dollar purchases as well as a mechanism of automatic purchases and sales of dollars to stabilize the exchange rate in 2011. Since October 2013, the Central Bank has intervened at a moderate pace (spot dollar purchases roughly \$10m per day). The government has also played an active role in resisting COP appreciation in recent years, by preventing the repatriation of some oil revenues, purchasing dollars with Treasury funds, and tightening restrictions on FX transactions by pension funds.

POLICY RATE

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** As from 2013, resident companies and foreign companies deriving income through branches or other permanent establishments in Colombia are subject to a tax rate of 25%. An additional corporate income tax for specific purposes (Impuesto sobre la renta para la equidad – CREE) is levied at a 9% rate. Non-resident companies deriving Colombian-source income not attributable to a branch or permanent establishment are subject to a 33% rate
- **Capital gains:** Capital gains are taxed at standard rate of CIT. Exemption or special 10% rate apply to certain gains (e.g. gains from lotteries and similar sources, and gains from alienation of fixed assets held for more than 2 years)
- **Withholding tax**
 - **On dividends:** Dividends paid to foreign companies or entities not domiciled in Colombia are not subject to a remittance surtax if the profits out of which the dividends are paid have already been taxed at the corporate level. Otherwise, income tax is imposed at the rate of 33% or 25% if dividends are attributable to a permanent establishment within Colombia
 - **On interest:** A 33% WHT applies on interest payments to non-

residents. A 14% WHT may apply on interest over loans exceeding a 1-year term, or interest or financial costs of leasing agreements with foreign companies (not resident in Colombia). A 1% WHT apply on payments under leasing agreements over helicopters, aircraft and their spare parts, entered into with foreign companies (not resident in the country), through leasing companies. Exemptions apply on interest on short-term import loans (not exceeding 12 months); interest on loans to finance or pre-finance exports; interest on bank overdrafts and on foreign credits granted to banks and financial entities; and interest or rent paid in connection with loans and leasing agreements, under certain conditions

REGULATION AND REPATRIATION

- Derivatives transactions must be made through the Regulated Exchange Market
- Residents are allowed to hold foreign currency accounts only if the latter has been attained through the open FX market
- To make a foreign exchange transaction, residents must submit an Exchange Declaration

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

MEXICO – MXN

(MEXICAN PESO) Deliverable **Yes** Convertible **Yes**

Mexico's GDP plunged 6.5% in 2009 as world demand for exports dropped, asset prices tumbled, and remittances and investment declined. GDP posted positive growth of 5% in 2010, with exports - particularly to the US - leading the way, while domestic consumption and investment lagged. The administration continues to face many economic challenges, including improving the public education system, upgrading infrastructure, modernizing labor laws, and fostering private investment in the energy sector. In November 2011, as a way to manage FX volatility and exchange rate depreciation, Banxico introduced a mechanism of automatic sales of dollars in the spot market of up to \$400m when the exchange rate weakened more than 2% beyond the previous day's fixing rate vs the USD. This program was abandoned in April 2013. Banxico remains one of the most hands-off exchange rate managers in EM, with a strong preference towards a floating exchange rate and a more traditional inflation-targeting monetary policy regime.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** The CIT is assessed at a flat rate of 30%
- **Capital gains:** Capital gains are taxed at standard rate of CIT. Capital gains are calculated through a separate process of calculation (e.g. sale of shares, sale of real property)
- **Withholding tax**
 - **On dividends:** A 10 WHT applies on dividends distributed by resident companies to non-residents from profits generated as of 2014
 - **On interest:** The WHT rate differs depending on the type of interest: a 10% rate applies, for instance, to interest a non-resident bank, interest relating to financial derivatives (provided certain conditions are met); a 4.9% rate applies, for instance, to interest paid to non-resident financial entities in which the federal government has a capital interest; a 15% rate applies to interest paid to reinsurance companies; a 21% rate applies, for instance, to interest which is not subject

to the 4.9% or 10% rates mentioned above, paid by Mexican financial institutions; a 35% rate applies to all other interest (some exemptions may apply); a 40% rate applies to interest paid to non-resident which is considered to be the beneficiary of a preferential tax regime

REGULATION AND REPATRIATION

- No Regulatory Restrictions in both Spot and Forward markets
- Local entities have the right to buy and sell foreign currency offshore.
- Free flow of capital is allowed across the borders

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

PERU – PEN

(PERUVIAN NUEVO SOL) Deliverable **Partial** Convertible **Yes**

The Peruvian economy grew by almost 6% per year during the period 2002-06, with a stable exchange rate and low inflation. Growth jumped to nearly 10% in 2008, driven by private investment and government spending, but then fell to less than 1% in 2009 with the recession. Growth resumed in 2010 at above 8%, due partly to a leap in private investment and continued high government spending. Inflation in 2010 was within the Central Bank's 1%-3% target range. Since 2006, Peru has signed trade deals with the US, Canada, Singapore, China, Korea, and Japan, concluded negotiations with the European Free Trade Association (EFTA) and Chile, and begun trade talks with Central American countries. From 2010 through 2012 the BCRP maintained a gradual nominal path of appreciation of the PEN vs the USD: the Central Bank was a net buyer of nearly \$26bn in reserves. Since late 2012 the Central Bank has attempted to deter some dollar borrowing onshore by raising FX requirements in foreign currency in relation to those in local currency, as well as by introducing more volatility and less consistency in its FX interventions. Since mid-2013 the Central Bank has sold dollars aggressively to prevent an excessive depreciation in the PEN, including \$5.2bn in 2013.

REGULATION AND TAX TREATMENT

TAXATION

- **Corporate income tax:** The corporate income tax on resident will decrease to 28% for income earned in 2015-2016, 27% for income earned in 2017-2018 and 26% for income earned from 2009
- **Capital gains:** Payments, in cash or in kind, including expenses and undeclared income, concealing an indirect disposal of business income not subject to later tax control, are subject to an additional corporate tax at the rate of 4.1%.
- **Withholding tax**
 - **On dividends:** The WHT rate on dividends in 2014 is 4.1%. The rate will increase to 6.8% for distributions from profits earned in 2015 and 2016; 8% for distributions from profits earned in 2017 and 2018; and,

9.3% for distributions from profits earned in 2019 onwards

- **On interest:** A 4.99% WHT is levied on interest from foreign debt claims, under certain conditions. A 30% WHT rate applies to other loans that do not comply with the requirements to be subject to the reduced rate of 4.99% and it also applies in respect of loans between associated enterprises

REGULATION AND REPATRIATION

- The Central Bank can intervene in the FX market
- The constitution guarantees full convertibility of the currency and there are no foreign exchange controls
- Foreign investors may open foreign currency accounts in domestic banks

The information can be modified at any time and should be checked by each investor with its legal and tax advisor. Societe Generale shall not assume any liability in this respect. Tax and regulation contents have been updated in Jan 2015.

URUGUAY – UYU

(URUGUAYAN PESO) Deliverable **No** Convertible **Yes**

The Uruguayan economy is characterized by an export oriented agricultural sector, a well-educated work force, and high levels of social spending. After a 5% average annual growth during 1996-98, in 1999-2002 the economy suffered a major downturn, stemming largely from the spillover effects of the economic problems of its neighbors, Argentina and Brazil. In 2001-02 a UYU plunge, a banking crisis, and a sharp economic contraction were triggered by the Argentinean crisis. Real GDP fell in four years by nearly 20%. The unemployment rate rose, inflation surged, and the burden of external debt doubled. Financial assistance from the IMF helped stem the damage. Economic growth for Uruguay resumed, and averaged 8% per year during the period 2004-08. The 2008-09 global financial crisis put a brake on Uruguay's vigorous growth, which decelerated to 2.9% in 2009. Nevertheless, the country managed to avoid a recession and keep positive growth rates, mainly through higher public expenditure and investment, and GDP growth exceeded 7% in 2010 and averaged 5.7% in 2011. According to IMF forecast, the real GDP is expected at 2.80% in 2015.

SHIELD

CORPORATE RISK MANAGEMENT

SHIELD brings together our recognised leadership in risk advisory and derivative solutions to offer you an innovative portal for the global management of your interest rate, foreign exchange, inflation and credit exposures.

HOW TO ACCESS SHIELD

- Go to <https://shield.sgcib.com>
- Enter the same email address and password you use for the SG Research portal
- If you have forgotten your password, simply click the "Forgot your password?" link on the Shield log-in page
- If you don't have access to SG Research yet, we will send you log-in details to allow you to access Shield

WHY SHIELD?

Over the years, **managing your financial exposures has increased in complexity**. As a corporate treasury professional, you are expected to understand not only your company's exposures, accounting treatment and regulatory environment, but also the technical solutions for these challenges.

As your company becomes more and more global, you need to **understand the markets and the impact they have on your exposures**. And each case is different.

With Shield, you will find a private portal with the tools you need to better manage your day-to-day risks. There are case studies to read, solutions to master technical issues, research to better understand markets. We show you recommended documents based on your specific risk management profile.

Visit Shield at your leisure, review the information at your pace, whatever your choice is.

KEY FEATURES

- **Risk management analysis:** by sector, geography and risk profile as well as the latest overviews of the regulatory and accounting environment in which you operate.
- **Real-time trading information:** including execution, cash management, valuations and confirmations.
- **Client-oriented solutions:** comprehensive range of multi-asset solutions and unique structuring expertise.
- **Societe Generale Cross-Asset Research:** fully-integrated research, providing you with relevant market insight to support your decisions in a single click.
- **Your unique view:** benefit from a unique and fully customised profile offering you the most relevant information, analysis and recommendations when you need it most.

CORPORATE RISK MANAGEMENT

GLOBAL EXOTIC FX FRONTIER CURRENCY SERVICES

Societe Generale's Global Exotic Currency Desk is your partner, providing a full complement of currency-related services for nearly every emerging market around the world

- Societe Generale global network is uniquely well positioned in the Global Exotic currency marketplace due to the CIB division's service to corporate, financial institutions and investors in over 33 countries

SPECIALIZED EXPERTISE

One department dedicated exclusively to very emerging currency exchange:

- Global Exotic Currency Desk sales/trader in the US manage frontier FX foreign exchange transactions in all currencies
- The team is well versed in the sometimes complicated banking and government regulations in these countries, and prides itself on the customised service it provides to clients

CUSTOMIZED SOLUTIONS

- We construct payment and trading programmes specific to each client's own currency-related situation
- Fast processing within an average of two business days
- Local expertise providing access to currency experts in local markets, economic outlooks and regulations
- Account management tools to help simplify your internal oversight of payments and transactions
- Third party payments, limiting the need of another account

ADDED BENEFITS

- Cost efficiencies that come with a successful, high volume, geographically diverse operation (competitive rates, access to technologies, tools that simplify the management of transactions)

CASH MANAGEMENT

All Maps are presented for representational purposes only

CORPORATE CASH MANAGEMENT

BUSINESS

The Cash Corporate Management Department promotes electronic banking and Cash Management services dedicated to corporate client, investors, medium and small businesses in France and abroad. These services are designed for account maintenance, management of means of payments, electronic banking and cash concentration solutions.

Domestic (France/France, Germany/Germany...) and international Cash Management offers allow companies to optimize the management of their liquidity on a daily basis.

THE OFFER

Solutions meant to meet the most complex needs. Banking services and electronic tools allowing multinational corporate groups, French or foreign, small, medium or large size, to manage on an automated basis both their cash flows and liquidity; as well as to secure all transactions in and out of accounts held worldwide with Societe Generale or third party banks able to issue account reporting via SWIFT/MT 940 messages, or intraday reporting (MT942) and to process remote payment and collection orders MT101/MT104).

A comprehensive range of services

- **Communication via multiple channels** (FTP, HTTPs, SWIFTNet, ...) and under different formats (MT 101, EDIFACT, XML and a large range of local formats) and management of payments and collections of all types;
- **Ability to forward transactions** to Societe Generale branches and subsidiaries and to third party partner banks; and 410 Bilateral MT 101 Agreements with third party banks
- **Best practice** in terms of security (SSL secure link, strong authentication supported by certificates, personal digital signature)

Main services

- **Sogecash Web:** Web: web tool, multi-function, multi-countries, multi-bank; available in English, French, German, Spanish and Chinese (initiation of payment and collection orders, viewing of account statements). This tool is regularly updated with new functionalities
- **Sogecash SWIFTNet** (forwarding of payment and collection orders from a single point, issuing FX deals confirmation advices and treasury forecasting, receiving reporting files under any formats)
- **Sogecash International Pooling** (cash concentration domestic and cross-border)
- **Sogecash Intraday Sweeping** (to include accounts held outside Societe Generale group. Provides for intraday cash concentration. Intraday reporting of transfer orders available)

COVERAGE

Societe Generale offers Cash Management services in around 50 countries. The following presentation of Societe Generale's capabilities in terms of Cash Management is not exhaustive and focused on countries using emerging currencies only. You will find hereafter a detailed presentation of our cash management offering across Central and Eastern Europe, Middle East, Africa and Asia. Your dedicated Relationship Manager or Cash Management Consultant are at your disposal to provide you with the complete list of countries where Societe Generale offers direct Cash Management services.

STAFF

The Corporate Cash Management Department amounts to 240 persons, cash management specialists: consultants, marketing, operations, business analysts, application manager, IT experts.
